**Higher Education 4.0** Kevin Anthony Jones, Sharma Ravishankar, 2021-04-15 This book chronicles a 10-year introduction of blended learning into the delivery at a leading technological university with a longstanding tradition of technology-enabled teaching and learning and state-of-the-art infrastructure. Hence, both teachers and students were familiar with the idea of online courses. Despite this, the longitudinal experiment did not proceed as expected. Though few technical problems, it required behavioural changes from teachers and learners, thus unearthing a host of socio-technical issues, challenges, and conundrums. With the undercurrent of design ideals such as tech for good, any industrial sector must examine whether digital platforms are credible substitutes or at best complementary. In this era of Industry 4.0, higher education like any other industry should not be about the creative destruction of what we value in universities but their digital transformation. The book concludes with an agenda for large repeatable Randomised Controlled Trials (RCTs) to validate digital platforms that could fulfil the aspirations of the key stakeholder groups: students, faculty, and regulators, as well as delving into the role of Massive Open Online Courses (MOOCs) as surrogates for fees-free higher education and whether the design of such a HiEd 4.0 platform is even a credible proposition. Specifically, the book examines the data-driven evidence within a design-based research methodology to present outcomes of two alternative instructional designs: evaluated traditional lecturing and blended learning. Based on the research findings and statistical analysis, it concludes that the inexorable shift to online delivery of education must be guided by informed educational management and innovation.

Dominatrix Danielle J. Lindemann, 2012-10-03 Our lives are full of small tensions, our closest relationships full of struggle between woman and man, artist and customer, purist and commercialist, professional and client, and between the dominant and the submissive. In Dominatrix, Danielle Lindemann draws on extensive fieldwork and interviews with professional dominatrices in New York City and San Francisco to offer a sophisticated portrait of these unusual professionals, their work, and their clients. Prior research on sex work has focused primarily on prostitutes, and most studies of BDSM absorb pro-domme client relationships without exploring what makes them unique. Lindemann satisfies our curiosity about these paid encounters, shining a light on one of the most secretive and least understood of personal relationships and unthreading a heretofore unexamined patch of our social tapestry. Upending the idea that these erotic laborers engage in simple exchanges and revealing the therapeutic and analytic nature of their work, Lindemann makes a major contribution to cultural studies, anthropology, and queer studies with her analysis of how gender, power, sexuality, and hierarchy shape all of our social experiences.
