**the Ash** James M. Deem,2005 Details the events that occurred when Mount Vesuvius erupted and buried Pompeii in 79 A D focusing on how this information was deduced from the skeletons found by archaeologists at the site In ancient times Pompeii was one of the largest cities in the Roman Empire Its 20 000 inhabitants lived in the shadow of Vesuvius which they believed was nothing more than a mountain But Vesuvius was a volcano And on the morning of August 24 A D 79 Vesuvius began to erupt Within twenty four hours the entire city of Pompeii and many of its citizens had been utterly annihilated It was not until hundreds of years later that Pompeii saw daylight again as archaeological excavations began to unearth what had been buried under layers of volcanic rubble Digging crews expected to find buildings and jewelry and other treasures but they found something unexpected too the imprints of lost Pompeiians their deaths captured as if by photographic images in volcanic ash      *Pompeii: Its Destruction and Re-discovery.
