[Airport Passenger Terminal Planning and Design: Spreadsheet models and user's guide](#) Landrum & Brown,2010 TRB s Airport Cooperative Research Program ACRP Report 25 Airport Passenger Terminal Planning and Design comprises a guidebook spreadsheet models and a user s guide in two volumes and a CD ROM intended to provide guidance in planning and developing airport passenger terminals and to assist users in analyzing common issues related to airport terminal planning and design Volume 1 of ACRP

Report 25 explores the passenger terminal planning process and provides in a single reference document the important criteria and requirements needed to help address emerging trends and develop potential solutions for airport passenger terminals Volume 1 addresses the airside terminal building and landside components of the terminal complex Volume 2 of ACRP Report 25 consists of a CD ROM containing 11 spreadsheet models which include practical learning exercises and several airport specific sample data sets to assist users in determining appropriate model inputs for their situations and a user's guide to assist the user in the correct use of each model The models on the CD ROM include such aspects of terminal planning as design hour determination gate demand check in and passenger and baggage screening which require complex analyses to support planning decisions The CD ROM is also available for download from TRB's website as an ISO image

Advancements in Electric Machines J. F. Gieras, 2008-11-14 Traditionally electrical machines are classified into d c commutator brushed machines induction asynchronous machines and synchronous machines These three types of electrical machines are still regarded in many academic curricula as fundamental types despite that d c brushed machines except small machines have been gradually abandoned and PM brushless machines PMBM and switched reluctance machines SRM have been in mass production and use for at least two decades Recently new topologies of high torque density motors high speed motors integrated motor drives and special motors have been developed Progress in electric machines technology is stimulated by new materials new areas of applications impact of power electronics need for energy saving and new technological challenges The development of electric machines in the next few years will mostly be stimulated by computer hardware residential and public applications and transportation systems land sea and air At many Universities teaching and research strategy oriented towards electrical machinery is not up to date and has not been changed in some countries almost since the end of the WWII In spite of many excellent academic research achievements the academia industry collaboration and technology transfer are underestimated or quite often neglected Underestimation of the role of industry unfamiliarity with new trends and restraint from technology transfer results with time in lack of external financial support and drastic decline in the number of students interested in Power Electrical Engineering *Scientific and Technical Aerospace Reports*, 1995

Airways, 2007 *Air Navigation* Octavian Thor Pleter, 2024-04-22 This book takes a new approach to air navigation extending the classic scope of positioning and guidance to efficient and safe 4D flight trajectory management Modern air navigation aims at flight trajectories optimisation There is an infinite number of solutions to the classic navigation problem of flying from one airport to another but most of them are wasteful of resources and even risky Minimising all costs and risks incurred by the 4D flight trajectory makes air navigation both efficient and safe which are key factors in air navigation services Beyond minimising fuel burn and CO2 efficiency addresses non CO2 emissions and noise This is a visually intensive book using examples and case studies to illustrate the concepts the physics of navigation and the mathematical models involved Numerical examples reflect its problem solving nature It is useful to aerospace students engineers pilots air traffic
