

## Fluency: Proportions

These student groups in this problem set have both angles measured in degrees and in radians.

1. Complete 1.4.1 using radians. Label the given arc length as a circumference for circles of  $r$ . What does your arc length have to do with the given  $r$ ?

Angle	Measure
$90^\circ$	$\pi/2$ rad
$45^\circ$	$\pi/4$
$30^\circ$	$\pi/6$
$15^\circ$	$\pi/12$
$10^\circ$	$\pi/18$
$6^\circ$	$\pi/30$
$3^\circ$	$\pi/60$
$1.5^\circ$	$\pi/120$
$0.75^\circ$	$\pi/240$
$0.375^\circ$	$\pi/480$
$0.1875^\circ$	$\pi/960$
$0.09375^\circ$	$\pi/1920$
$0.046875^\circ$	$\pi/3840$

Angle	Measure
$1.57^\circ$	$0.027$ rad
$0.26^\circ$	$0.0045$
$0.043^\circ$	$0.00075$
$0.0072^\circ$	$0.000125$
$0.0012^\circ$	$2.1 \times 10^{-5}$
$0.0002^\circ$	$3.5 \times 10^{-6}$
$0.00003^\circ$	$5.2 \times 10^{-7}$
$0.000005^\circ$	$8.7 \times 10^{-8}$
$0.0000008^\circ$	$1.4 \times 10^{-8}$
$0.00000013^\circ$	$2.2 \times 10^{-9}$
$0.00000002^\circ$	$3.5 \times 10^{-10}$
$0.000000003^\circ$	$5.2 \times 10^{-11}$

Remember that degree measures are proportional with the magnitude of  $360^\circ$  and radian measures with the magnitude of  $2\pi$  radians. Before students label angles, describe circles for which each radian measure is a circumference for circles of  $r$ . These labels match the first problem set's problem set.

Find radian measures for angles of radians that would be convenient with each of the following angle measures.

$$45^\circ = \frac{\pi}{4}$$

$$90^\circ = \frac{\pi}{2}$$

$$135^\circ = \frac{3\pi}{4}$$

$$180^\circ = \pi$$

$$270^\circ = \frac{3\pi}{2}$$

Teaching and Learning High School Mathematics Charlene E. Beckmann, Denisse R. Thompson, Rheta N.

Rubenstein, 2009-11-02 Too many high school students faced with mathematics in courses at the level of algebra and beyond find themselves struggling with abstract concepts and unwilling to pursue further study of mathematics When students curtail their course taking in mathematics they may be impacting their college and career options Thus high school mathematics teachers have the responsibility to help students recognize the value and importance of mathematics while also designing instruction that makes mathematics accessible to all students Ball and Bass 2000 as well as other mathematics educators have recognized that mathematics teachers not only need to know mathematics content and mathematics pedagogy i e teaching strategies but they also need to know how these ideas are integrated This mathematical knowledge for teaching is the knowledge that teachers of mathematics need and it differs from the knowledge that research or applied mathematicians must know This text is designed to provide teachers with insights into this mathematical knowledge for teaching Teaching and Learning High School Mathematics is likely different from many other texts that you have used It integrates both content and pedagogy to help you develop and build your own understanding of teaching The text is designed to help you develop deep conceptual understanding of fundamental mathematics Ma 1999 so that you are able to approach mathematics from multiple perspectives with many tools Such flexibility in teaching is essential if teachers are to help all students become mathematically proficient Throughout this book you are encouraged to work in cooperative teams This strategy is designed to help you develop a mathematics learning community and build a professional network that will be a valuable resource during your professional career Hopefully you will experience the benefits of engaging in rich mathematical discussions with peers and consider how to encourage such learning environments in your own classrooms Lesson planning is another element pervasive throughout this text To help teachers plan for effective student centered lessons the Question Response Support QRS Guide is introduced in Lesson 1 1 and used throughout the remainder of the lessons The QRS Guide is a tool on which teachers may record tasks or questions Q for students expected and observed student responses R and teacher support S in the form of additional just enough questions to support students in their progress on the task In each unit teachers expand their repertoire of teaching and learning elements and strategies and incorporate these elements as they plan additional lesson segments In Unit 4 lesson planning is formally introduced as teachers put together elements from previous units into complete cohesive lesson plans *Resources in Education* ,1998

**A Five-Year Study of the First Edition of the Core-Plus Mathematics Curriculum** Harold Schoen, Steven W. Ziebarth, Christian R. Hirsch, Allison BrckaLorenz, 2010-07-01 The study reported in this volume adds to the growing body of evaluation studies that focus on the use of NSF funded Standards based high school mathematics curricula Most previous evaluations have studied the impact of field test versions of a curriculum Since these innovative curricula were so new at the time of many of these studies students and teachers were relative novices in their use These earlier studies were mainly one year or less in duration Students in the comparison groups were typically from schools in which some classes used a Standards based curriculum and other classes used a conventional curriculum rather than using the Standards based curriculum with all students as curriculum developers intended The volume reports one of the first studies of the efficacy of Standards based mathematics curricula with all of the following characteristics The study focused on fairly stable implementations of a first edition Standards based high school mathematics curriculum that was used by all students in each

of three schools It involved students who experienced up to seven years of Standards based mathematics curricula and instruction in middle school and high school It monitored students mathematical achievement beliefs and attitudes for four years of high school and one year after graduation Prior to the study many of the teachers had one or more years of experience teaching the Standards based curriculum and or professional development focusing on how to implement the curriculum well In the study variations in levels of implementation of the curriculum are described and related to student outcomes and teacher behavior variables Item data and all unpublished testing instruments from this study are available at [www.wmich.edu/cmpmp](http://www.wmich.edu/cmpmp) for use as a baseline of instruments and data for future curriculum evaluators or Core Plus Mathematics users who may wish to compare results of new groups of students to those in the present study on common tests or surveys Taken together this volume the supplement at the CPMP Web site and the first edition Core Plus Mathematics curriculum materials samples of which are also available at the Web site serve as a fairly complete description of the nature and impact of an exemplar of first edition NSF funded Standards based high school mathematics curricula as it existed and was implemented with all students in three schools around the turn of the 21st century
