Computer Vision -- ACCV 2014 Daniel Cremers, Ian Reid, Hideo Saito, Ming-Hsuan Yang, 2015-04-16 The five volume set LNCS 9003 9007 constitutes the thoroughly refereed post conference proceedings of the 12th Asian Conference on Computer Vision ACCV 2014 held in Singapore Singapore in November 2014 The total of 227 contributions presented in these volumes was carefully reviewed and selected from 814 submissions The papers are organized in topical sections on recognition 3D vision low level vision and features segmentation face and gesture tracking stereo physics video and events and poster sessions 1 3 *Exploring Mechanisms of Cardiac Rhythm Disturbances Using Novel Computational Methods: Prediction, Classification, and Therapy* Xin Li, G. Andre Ng, Fernando Soares Schlindwein, Jichao Zhao, Martin Bishop, 2023-03-16

Developments in Diagnosis and Management of Thyroid Cancer Carlotta Giani, Carla Colombo, Joana Simões-Pereira, 2025-03-25 Recent advances in knowledge about thyroid cancer show the need for a personalized approach both for indolent thyroid carcinomas which can be treated and followed with a more conservative approach and for advanced thyroid cancer which may need a more intensive follow up and aggressive therapy Several new trends in thyroid cancer approaches rose in the last few years In particular thyroid cancer management has been shifting towards a more conservative approach The focus has been directed to active surveillance in patients with thyroid microcarcinomas to local conservative non surgical therapies such as radiofrequency or alcohol ablation for microcarcinomas and local lymph node metastases and to minimally invasive surgical techniques Few data have been reported about these new techniques but they may become the standard of care particularly for those patients with microcarcinomas with anxiety about active surveillance or for those who present local tumor growth under active surveillance Furthermore in the last decades molecular techniques have opened up new diagnostic scenarios in the pre intervention identification and risk classification of patients with a known diagnosis of thyroid carcinoma that improved patient management and follow up Regarding advanced thyroid tumors new drugs have been developed to control the disease such as multi tyrosine kinase inhibitors and targeted therapies However in some cases tumors become resistant to these drugs Currently there are no reliable markers clinical or molecular that have been found to be predictive of an early escape from therapy control Other drugs for this kind of tumor should be developed to be used as second third or successive treatment and studies combining two or more drugs are needed to explore the possibility of overcoming the resistance to a single therapy Brain-Mind-Body Practice and Health Yi-Yuan Tang, 2018-01-09 It is acknowledged that practice could induce rapid change or reorganization of the brain's cellular or neural networks as well as behaviors Notably practice relevant to mental or physical approach attracted great attention in this decade It highlights profound significance both for human evolution and individual development Specifically acquiring fine motor skills is a crucial premise for human being to evolve to modern human by using tools in one side In the other side numerous evidences indicated that motor learning involved in limb and trunks promotes the development of individual brain

in anatomy and functions Hence motor learning is also tightly associated with developmental plasticity These studies on brain mind body practice illuminate a promising way in promoting human brain health This editorial covers wide range of brain mind body practice forms to summarize recent new findings and development from behavioral physiological neurobiological and psychological science approaches In this research topic we addressed recent findings from theoretical as well as experimental perspective including contributions under the following three headings 1 intervention studies to investigate the positive effect of brain mind body practice on cognition and relevant brain mechanism The intervention pattern consisted of short term practice ranging from few hours to several weeks 2 cross sectional studies using expert novice paradigm to explore the behavioral and neural system change induced by extensive brain mind body practice 3 the mediators influence the relationship between practice and health outcomes and 4 new viewpoints on brain mind body practice from theoretical perspectives Here we briefly highlight these articles aiming to provide a deep understanding for the association between practice plasticity and health for readers Additionally it offers new insights for developing possible practice interventions for clinical treatment of neurological dysfunction or disorders Urban and Maritime Transport

XXVII G. Passerini, S. Ricci, 2021-09-01 Better urban transport systems and the need for a healthier environment are continuous requirements that create a fertile atmosphere for original ideas innovative approaches and applications of advanced technologies their tests and evaluations in practice Moreover there is a growing need for integration with IT systems and applications to improve safety and efficiency Meanwhile the substantial growth of maritime shipping has resulted in large transported quantities around the world creating a demand for innovative solutions for ports and fleets The apparently parallel topics of Urban Transport and Maritime Transport meet in the transport and environmental management of coastal cities both being affected positively and negatively by landslide and seaside traffic Maritime Transport is highly interconnected with rail road and air services as well as inland waterways Each of these must therefore operate complimentary of one another to maximise efficiency and respond rapidly to variable economic and political contingencies The variety of topics covered in this volume reflects the complex interaction of transport systems with their environment and the need to establish integrated strategies The goal is to arrive at optimal socio economic solutions while reducing the negative environmental impacts of transportation systems typically by interdisciplinary approaches *Digital Forensics and Forensic Investigations: Breakthroughs in Research and Practice* Management Association, Information

Resources, 2020-04-03 As computer and internet technologies continue to advance at a fast pace the rate of cybercrimes is increasing Crimes employing mobile devices data embedding mining systems computers network communications or any malware impose a huge threat to data security while cyberbullying cyberstalking child pornography and trafficking crimes are made easier through the anonymity of the internet New developments in digital forensics tools and an understanding of current criminal activities can greatly assist in minimizing attacks on individuals organizations and society as a whole Digital

Forensics and Forensic Investigations Breakthroughs in Research and Practice addresses current challenges and issues emerging in cyber forensics and new investigative tools and methods that can be adopted and implemented to address these issues and counter security breaches within various organizations. It also examines a variety of topics such as advanced techniques for forensic developments in computer and communication link environments and legal perspectives including procedures for cyber investigations standards and policies. Highlighting a range of topics such as cybercrime threat detection and forensic science, this publication is an ideal reference source for security analysts, law enforcement, lawmakers, government officials, IT professionals, researchers, practitioners, academicians, and students currently investigating the up and coming aspects surrounding network security, computer science, and security engineering.

Cross-Media Authentication and Verification: Emerging Research and Opportunities Katsaounidou, Anastasia, Dimoulas, Charalampos, Veglis, Andreas, 2018-07-13 As media becomes more readily available in the digital age, it also becomes more vulnerable to tampering and manipulation, making techniques for verifying reliable news and media sources essential. Understanding online technologies' role in shaping the media environment allows for insight into the correlations between the rapidly transforming media landscape and its unwanted effect on news and content tampering. *Cross Media Authentication and Verification: Emerging Research and Opportunities* is a collection of innovative research on the methods and applications of verifying the newsgathering and publishing process. While highlighting topics including human authentication, information evaluation, and tampered content, this book is ideally designed for researchers, students, publishers, and academicians seeking current research on media authenticity and misinformation.

Challenges Towards Ecological Sustainability in China Xiaojun Yang, Shijun Jiang, 2018-12-15 This book includes a selection of the best papers presented at the Jinan Forum on Geography and Ecological Sustainability held in Guangzhou, China, from 17 to 19 February 2017, as well as several invited papers. It discusses concepts, methods, and applications in geography and ecology with an emphasis on various issues challenging ecological sustainability in China. Chapters are written by leading scholars and researchers from a variety of disciplines, including geography, ecology, environmental science, and policy, and economics. Case studies are predominantly drawn from Southern China, where nearly four decades of dramatic urbanization has caused economic and ecological strains on land and people. This book will appeal to a wide readership, including researchers, upper division undergraduate and graduate students, and professionals in the fields of sustainability, science, geography, ecology, and environmental science and policy.

Wunderer,2024-12-24 Developments of cutting edge X ray imaging detectors are largely driven by experiments at the large photon science facilities i e the synchrotron radiation sources and free electron lasers FELs which enable a wealth of investigations in physics material science biology chemistry environmental sciences and beyond The next generation radiation sources namely diffraction limited storage rings DLSR and high repetition rate FELs operated in the continuous wave CW mode not only offer brilliant opportunities for research but also pose new challenges and requirements for the X ray detectors required to exploit them fully Examples include the high count rate capability required at the DLSRs the ultra high continuous frame rate and data throughput at the FELs and a broad photon energy range from tens of eV to hundreds of keV spanned by the facilities In order to meet the new requirements posed by the most advanced photon science facilities envisioned or already under development around the world today various novel photon detection and imaging concepts are being investigated and detector technologies are advancing fast The goal of this research topic is to address the challenges and discuss the critical problems encountered in imaging systems for photon science including but not limited to

sensing materials ASICs readout electronics detector systems and data reduction Moreover it will encompass a discussion of the development strategies technological advances and recent achievements of each subject thereby facilitating the realization of complete concepts for novel imaging systems as well as further developments of individual detector technologies

Science and Applications of Coastal Remote Sensing Kevin Ross Turpie, Tiffany Kay Moisan, Kristin B. Byrd, Steven G. Ackleson, 2021-06-01 IN MEMORIAL This Research Topic is dedicated to our co editor Dr Tiffany Moisan a well regarded ocean color remote sensing scientist who unexpectedly passed away during its preparation Dr Moisan was a dear friend and upbeat and enthusiastic colleague and a scientist committed to the use of remote sensing to improve our understanding of marine microbiology and phytoplankton ecology She was a strong supporter of the development of remote sensing capabilities and applications for coastal and inland waters and we know that she would have wanted this Research Topic to provide her colleagues an opportunity to share and promote their work in this area A voice in our community is now quiet Let the chorus of our shared song continue with her memory Dr Tiffany Moisan is survived by her loving family including her husband Dr John Moisan and her two daughters
