**2012 GCSE English results** Great Britain: Parliament: House of Commons: Education Committee,2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007 09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with

consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do

**The Report: Saudi Arabia 2015** Oxford Business Group, 2015-09-22 While Saudi Arabia s economy remains dominated by its hydrocarbons sector several other sectors have emerged in recent years as key propellers of economic growth The Kingdom s financial services industries have continued to expand steadily despite the

liquidity challenges posed by falling oil prices Trade and investment are being treated as key priorities as the government looks to negotiate this altered economic landscape aiming to leverage its large population high per capita income and many sea and air links The country's capital markets sector meanwhile is poised for a period of significant growth on the back of the opening of Tadawul to international investors in 2015 and the raft of regulatory upgrades implemented as result The domestic insurance industry which remains dominated by the motor and medical segments has enjoyed double digit growth over the past five years in both revenue and net profit Elsewhere the targets outlined in Vision 2030 indicate that a period of greater opportunity and integration is on the horizon for private players operating in core sectors such as health care utilities industry and ICT

Getting value for money from the education of 16- to 18-year-olds Great Britain: Parliament: House of Commons: Committee of Public Accounts,2011-08-16 This report examines the effectiveness and efficiency of the current education system for 16 to 18 year olds In 2009 over 1.6 million 16 to 18 year olds participated in some form of education and training at a cost of over 6 billion Most studied full time for qualifications such as A levels or National Vocational Qualifications at a general further education college sixth form college or school sixth form The system governing the education of 16 to 18 year olds is devolved and complex The Department for Education the Department has overall responsibility and the Young People's Learning Agency funds education providers and monitors their performance Local authorities have a duty to secure provision but they have limited powers and having duties without powers cannot work effectively There has been an overall improvement in the achievements of 16 to 18 year olds over the last four years Students in larger providers have generally achieved better results Smaller providers by collaborating can achieve some of the benefits of size In a market consistently poor providers should fail because they lose funding as students choose to study elsewhere For the 16 to 18 education market to work effectively there needs to be consistent and relevant information so the Department can assess value for money and students can make informed judgements about their courses and what they lead to Also where a provider's performance is poor there must be clarity about the criteria for intervention and the timing and extent of intervention Neither is fully in place at present
