

# GLOBAL THEMATIC ESSAY TOPIC #4/20

## CHANGE – GLOBAL ISSUES

### **Example 1 = Pollution ... read more in Unit 20!**

**THESIS** – "One global issue that has affected the world greatly is pollution."

**TASK #1** – Pollution is the contamination on Earth's air, water and/or soil. It has increased dramatically since the Industrial Revolution. Improved technology has led to machines that burn fossil fuels, such as coal, natural gas, and petroleum (oil). Burning fossil fuels creates carbon dioxide (CO<sub>2</sub>), a greenhouse gas that leads to Global warming. The concentration of CO<sub>2</sub> in the Earth's atmosphere has risen 50% since 1750 (since the start of the Industrial Revolution). Pollution affects all areas of the world since wind and water currents constantly move. Pollution has increased as large nations like China, India or Brazil begin to industrialize more. Overpopulation (human population = 7.3 billion) also causes more pollution.

**TASK #2** – Global warming causes the polar ice caps and glaciers to melt, leading to rising sea levels, higher temperatures and more natural disasters like hurricanes and floods. Ecosystems and habitats have been affected, leading to more endangered species of plants/animals. Renewable sources of energy like solar power and wind power are increasing, but poorer nations often cannot afford this technology.

### **Example 2 = Nuclear Proliferation ... read more in Unit 25!**

**THESIS** – "Another global issue that has impacted the world is nuclear proliferation."

**TASK #1** – Nuclear proliferation is the spread of nuclear technology to more nations. Nuclear weapons were developed first by the U.S.A. during World War II. During the Cold War the U.S.S.R. developed nuclear weapons as well, leading to an arms race between the two superpowers. The U.S.A. and U.S.S.R. built thousands of nuclear bombs during the Cold War, raising tension between them. The Cuban Missile Crisis brought the world to the brink of nuclear war. Since then, other nations have developed nuclear weapons, like India, Pakistan, France, Israel, or North Korea. These nations developed nuclear power as an alternative source of energy, as well as to protect themselves in case of future nuclear wars.

**TASK #2** – The threat of nuclear war remains, even after the end of the Cold War. Conflicts between India and Pakistan and North and South Korea have raised concern. The rise of terrorism, such as al-Qaeda and ISIS, raises fears about the security of nuclear weapons. Radioactive pollution has increased, and nuclear power plant disasters like Chernobyl (Ukraine) and Fukushima (Japan) spread radiation far. In 2015, many nations worry about the nuclear potential of Iran or North Korea."

### **Predicting June 2014 Global Thematic Essay:**

**The UN at War** John Karlsrud, 2017-11-26 This book is a critical political and institutional reflection on UN peace operations. It provides constructive suggestions as to how the UN and the international system can evolve to remain relevant and tackle the peace and security challenges of the 21st century without abandoning the principles that the UN was founded upon and on which the legitimacy of UN peace operations rests. The author analyses the evolving politics on UN peace operations of the five veto powers of the UN Security Council as well as major troop contributing countries and western powers. He investigates the move towards peace enforcement and counter terrorism and what consequences this development may have for the UN. Karlsrud issues a challenge to practitioners and politicians to make sure that the calls for reform are anchored in a desire to improve the lives of people suffering in conflicts on the ground and not spurred by intra organizational turf battles or solely the narrow self interests of member states. Finally he asks how the UN can adapt its practices to become more field and people centered in line with its core primary commitments of protecting and serving people in need.

**Evaluating Sustainable Development and Corporate Social Responsibility Projects** Tony Kealy, 2020-01-20 This book discusses sustainable development decision making. Focusing on decisions to invest in wind turbine technology as part of a corporation's CO2 emission reduction strategy, it presents a new evaluation framework based on the triple bottom line framework widely used by businesses to communicate their adherence to corporate social responsibility. This new framework allows the evaluation of strategic corporate decisions to invest in wind turbines to mitigate global warming in the context of a corporation's social responsibility and includes an objective measurement stage to add rigor to the evaluation process. The book describes the use of measured data from wind turbine projects to both develop and validate the methodology and also identifies key enablers and barriers as businesses attempt to successfully integrate corporate social responsibility into their overall business strategy. Given its scope, the book appeals to postgraduate students, researchers, and business professionals interested in the environmental impact of corporations. Featuring case studies from Ireland, it is particularly relevant to audiences within Europe.

**Measuring Voice, Speech, and Swallowing in the Clinic and Laboratory** Christy L. Ludlow, Raymond D. Kent, Lincoln C. Gray, 2018-03 Measuring Voice, Speech, and Swallowing in the Clinic and Laboratory provides a definitive reference and text for methods of measurement of voice, speech, and swallowing functioning and disorders. **Transitional Justice in Peacebuilding** Djeyhoun Ostowar, 2020-11-22 This book explores the role of actors in determining transitional justice in peacebuilding contexts In recent decades transitional justice mechanisms and processes have been introduced to a variety of settings becoming widely regarded as essential elements in the peacebuilding toolbox While it has increasingly been suggested that transitional justice is imposed by neo imperial actors with little regard for the needs and cultures of local populations evidence suggests that dismissing these policies as neo imperial or neo liberal impositions would result in grossly overlooking their dynamics which involve a whole range of relevant actors operating at multiple levels This book interrogates this theme through empirical analysis of three sites of peacebuilding that have seen extensive international involvement Kosovo East Timor and Afghanistan It proposes a novel framework for analysing and approaching transitional justice in peacebuilding that disaggregates three broad sets of actors operating at different levels in relevant processes external actors international and regional levels transitional justice promoters local national international and transnational levels and transitional regimes national and local levels The book argues that transitional justice in peacebuilding must be conceived of as actor contingent and malleable due to the significance of agency and inter actions of key categories of actors throughout peacebuilding transition This book will be of interest to students and practitioners of transitional justice peacebuilding law and International Relations
