Geometry and Nonlinear Partial Differential Equations Shing-Tung Yau, Shuxing Chen, 2002 This book presents the proceedings of a conference on geometry and nonlinear partial differential equations dedicated to Professor Buqing Su in honor of his one hundredth birthday It offers a look at current research by Chinese mathematicians in differential geometry and geometric areas of mathematical physics It is suitable for advanced graduate students and research mathematicians interested in geometry topology differential equations and mathematical physics

Numerical Analysis Walter Gautschi, 1997-08-19 *75 Years of Mathematics of Computation* Susanne C. Brenner, Igor E. Shparlinski, Chi-Wang Shu, Daniel Szyld, 2020-07-29 The year 2018 marked the 75th anniversary of the founding of Mathematics of Computation one of the four primary research journals published by the American Mathematical Society and the oldest research journal devoted to computational mathematics To celebrate this milestone the symposium Celebrating 75 Years of Mathematics of Computation was held from November 13 2018 at the Institute for Computational and Experimental Research in Mathematics ICERM Providence Rhode Island The sixteen papers in this volume written by the symposium speakers and editors of the journal include both survey articles and new contributions On the discrete side there are four papers covering topics in computational number theory and computational algebra On the continuous side there are twelve papers covering topics in machine learning high dimensional approximations nonlocal and fractional elliptic problems gradient flows hyperbolic conservation laws Maxwell's equations Stokes's equations a posteriori error estimation and iterative methods Together they provide a snapshot of significant achievements in the past quarter century in computational mathematics and also in important current trends

Handbook of Computational Methods for Integration Prem K. Kythe, Michael R. Schäferkott, 2004-12-20 During the past 20 years there has been enormous productivity in theoretical as well as computational integration Some attempts have been made to find an optimal or best numerical method and related computer code to put to rest the problem of numerical integration but the research is continuously ongoing as this problem is still very much open

Recent Advances in the Aerospace Sciences Corrado Casci, 2012-12-06 This volume published in honor of Prof Luigi Crocco appears when Luigi Crocco celebrates his 75th birthday of a life devoted to study research and teaching The events in his life and World War II forced Luigi Crocco as well as other Italian scientists to look to foreign countries for the calm haven so vital to study This notwithstanding his scientific activity was never interrupted and this volume is an acknowledgment of scientists and researchers to his work and life Prefazione Questo volume in onore del prof ing Luigi Crocco vede la luce quando Luigi Crocco compie i 75 anni di una vita dedicata allo studio alla ricerca e all'insegnamento a Le vicende della vita ed anche della 2 guerra mondiale hanno costretto Luigi Crocco come altri scienziati italiani a dover cercare in altri Paesi quella serenità necessaria per dedicarsi allo studio Ma la sua attività scientifica non ha avuto interruzioni e questo volume essere la testimonianza di studiosi e di ricercatori alla sua opera e alla sua vita

Dynamic Equations on

Time Scales Martin Bohner, Allan Peterson, 2012-12-06 On becoming familiar with difference equations and their close relation to differential equations I was in hopes that the theory of difference equations could be brought completely abreast with that for ordinary differential equations HUGH L TURRITTIN *My Mathematical Expectations* Springer Lecture Notes 312 page 10 1973 A major task of mathematics today is to harmonize the continuous and the discrete to include them in one comprehensive mathematics and to eliminate obscurity from both E T BELL *Men of Mathematics* Simon and Schuster New York page 13 14 1937 The theory of time scales which has recently received a lot of attention was introduced by Stefan Hilger in his PhD thesis 159 in 1988 supervised by Bernd Aulbach in order to unify continuous and discrete analysis This book is an introduction to the study of dynamic equations on time scales Many results concerning differential equations carryover quite easily to corresponding results for difference equations while other results seem to be completely different in nature from their continuous counterparts The study of dynamic equations on time scales reveals such discrepancies and helps avoid proving results twice once for differential equations and once for difference equations The general idea is to prove a result for a dynamic equation where the domain of the unknown function is a so called time scale which is an arbitrary nonempty closed subset of the reals

Recent Trends in Nonlinear Partial Differential Equations II James Serrin, Enzo Mitidieri, Vicențiu D. Rădulescu, 2013 This book is the second of two volumes which contain the proceedings of the Workshop on Nonlinear Partial Differential Equations held from May 28 June 1 2012 at the University of Perugia in honour of Patrizia Pucci's 60th birthday The workshop brought together leading experts and researchers in nonlinear partial differential equations to promote research and to stimulate interactions among the participants **Computation and Applied Mathematics**, 2002 *Optimal Control Theory* Suresh P. Sethi, 2022-01-03 This new 4th edition offers an

introduction to optimal control theory and its diverse applications in management science and economics It introduces students to the concept of the maximum principle in continuous as well as discrete time by combining dynamic programming and Kuhn Tucker theory While some mathematical background is needed the emphasis of the book is not on mathematical rigor but on modeling realistic situations encountered in business and economics It applies optimal control theory to the functional areas of management including finance production and marketing as well as the economics of growth and of natural resources In addition it features material on stochastic Nash and Stackelberg differential games and an adverse selection model in the principal agent framework Exercises are included in each chapter while the answers to selected exercises help deepen readers understanding of the material covered Also included are appendices of supplementary material on the solution of differential equations the calculus of variations and its ties to the maximum principle and special topics including the Kalman filter certainty equivalence singular control a global saddle point theorem Sethi Skiba points and distributed parameter systems Optimal control methods are used to determine optimal ways to control a dynamic system The theoretical work in this field serves as the foundation for the book in which the author applies it to business management

problems developed from his own research and classroom instruction The new edition has been refined and updated making it a valuable resource for graduate courses on applied optimal control theory but also for financial and industrial engineers economists and operational researchers interested in applying dynamic optimization in their fields

Nonlinear Problems in Mathematical Physics and Related Topics Michael Sh. Birman, 2002 The main topics in this volume reflect the fields of mathematics in which Professor O A Ladyzhenskaya obtained her most influential results One of the main topics considered is the set of Navier Stokes equations and their solutions
