satisfied simply to have found an instructive angle from which to explore the mysteries in a modern experimental monarchy His keen sense of time has filled his narrative with insights that only a few people could have identified To me that is a mark of one with a fine sense of what the past can mean I thank him for the chance to see this mature and thoughtful Charnvit at work and commend this book to everyone who wants to understand Thailand better Wang Gungwu National University of Singapore Charnvit makes clear in the final pages of *Thailand A Struggle for the Nation* that he is not very sanguine about the country's future During Thailand's democratic spring in 1974 the Thai constitution was changed to allow female succession This apparent loosening of male prerogative had no effect on the reign change in 2016 when the designated male heir Prince Vajiralongkorn succeeded without challenge to become the tenth Bangkok king Communism long gone as the spectre that once haunted Thailand's political order has been replaced by another The spectre now haunting Thailand is authoritarianism Craig J Reynolds Australian National University

*Embodied Nation* Simon Creak, 2017-08-31 This strikingly original book examines how sport and ideas of physicality have shaped the politics and culture of modern Laos Viewing the country's extraordinary transitions from French colonialism to royalist nationalism to revolutionary socialism to the modern development state through the lens of physical culture Simon Creak's lively and incisive narrative illuminates a nation that has no reputation in sport and is typically viewed even from within as a country of cheerful but lazy people Creak argues that sport and related physical practices including physical education gymnastics and military training have shaped a national consciousness by locating it in everyday experience These practices are popular participatory performative and above all physical in character and embody ideas and ideologies in a symbolic and experiential way *Embodied Nation* takes readers on a brisk ride through more than a century of Lao history from a nineteenth century game of tikhi an indigenous game resembling field hockey to the country's unprecedented outpouring of nationalist sentiment when hosting the 2009 Southeast Asian Games En route we witness a Lao Vietnamese soccer brawl in 1936 the fascist inspired body ethic of the early 1940s the novel modes of military masculinity that blossomed with national independence the spectacular state theatrics of power represented by Olympic

inspired sports festivals and the high hopes and frequent failures of socialist sport in the 1970s and 1980s Of central concern in Creak s narrative are the twin motifs of gender and civilization Despite increasing female participation since the early twentieth century he demonstrates the major role that sport and physical culture have played in forming hegemonic masculinities in Laos Even with limited national sporting success Laos has never won an Olympic medal the healthy toned and muscular form has come to symbolize material development and prosperity Embodied Nation outlines the complex ways in which these motifs through sport and physical culture articulate with state power Combining cultural and intellectual history with historical thick description Creak draws on a creative array of Lao and French sources from previously unexplored archives newspapers and magazines and from ethnographic writing war photography and cartoons More than an imagined community or geobody he shows that Laos was also a body at work making substantive theoretical contributions not only to Southeast Asian studies and history but to the study of the physical culture nationalism masculinity and modernity in all modern societies

*Heritage in Action* Helaine Silverman, Emma Waterton, Steve Watson, 2016-11-10 In this textbook we see heritage in action in indigenous and vernacular communities in urban development and regeneration schemes in expressions of community in acts of nostalgia and memorialization and counteracts of forgetting in museums and other spaces of representation in tourism in the offices of those making public policy and in the politics of identity and claims toward cultural property Whether renowned or local tangible or intangible the entire heritage enterprise at whatever scale is by now inextricably embedded in value The global context requires a sanguine approach to heritage in which the so called critical stance is not just theorized in a rarefied sphere of scholarly lexical gymnastics but practically engaged and seen to be doing things in the world
