modern society Their model includes discussions of the following key concepts Technology must be ubiquitous necessary and invisible Classrooms must be learner centric and use backwards design principles Good technology can be better than new technology Teachers must serve as mentors and bring real world experiences to students Each section of Building School 2.0 presents a thesis designed to help educators and administrators to examine specific practices in their schools and to then take their conclusions from theory to practice Collectively the theses represent a new vision of school built off of the best of what has come before us but with an eye toward a future we cannot fully imagine
