

Typical Questions for CSL 101 – J

Study Unit 1

This study unit introduces a number of constitutional concepts. It is easier to understand the constitution if you know what the constitutional concepts mean.

1 Explain what is meant by constitutional law? (3)

We can define constitutional law as those rules that regulate the manner in which state authority is exercised and shared. It also relates to those rules which regulate the relationship between organs of state inter se, and between organs of state and individuals.

2 Distinguish between public and private law, and state why constitutional law is said to be part of public law (5)

Public law is the branch of law which regulates the exercise of state authority in relationships of inequality. Private law, in contrast, governs the relationships between people who are on an equal footing. Constitutional law forms part of public law as it regulates public interest which comes into play in legal relationships of subordination, either between administrative authorities themselves or between administrative authorities and private individuals.

3 "The distinction between private and public law has become blurred in modern times". Discuss this statement with particular reference to the reasons why this blurring has occurred. (6)

The reason why the distinction between public and private law has become blurred is that the modern state has become very involved in private law relationships, such as the relationship between employee and employer. The new constitution expressly provides for relationships between private individuals in the Bill of Rights. It also authorizes parliament to enact legislation to prohibit unfair discrimination by private persons and companies. Finally traditional public functions such as public transport or telecommunications are being privatized and being run by semipublic corporations or private contractors.

4 Discuss the five sources of constitutional law. (10)

The five sources of constitutional law are:

- The constitution, which means the entire body of rules governing the exercise of state authority or a written document which contains some or most of the constitutional rules.
- Other statutory sources, it is often left to legislation to flesh out the norms and values of the constitution.
- Common law. English common law played an important role in the history of South African law and must therefore be taken into account.
- Case law. Past judgments are binding and determine the meaning of constitutional provisions.
- Other sources are also taken into account such as academic writings, policy documents and reports of various government bodies (such as the public protector).

5 Distinguish an inflexible constitution from a flexible one and mention an example of each. (6)

A flexible constitution has the same status as ordinary laws of the land and has no special procedures for amendment. An example would be the 1961 constitution of South Africa. An inflexible constitution usually enjoys a higher status to other laws and requires a special amendment procedure. An example is the 1996 constitution of South Africa.

6 Does South Africa have a flexible or inflexible constitution? (3)
