**Civil Airliner Flight Guidance Technology for Four-Dimensional Trajectory-Based Operation** Guangwen Li, Shaobo Zhai, Qiuling Jia, 2024-09-16 This book focuses on achieving precision guidance and timely arrival in flight. The content comprehensively describes the civil aircraft flight guidance technology for four-dimensional trajectory-based operation. The main content of this book is the summary of the author's team's research work on flight management systems and flight guidance technology over the past decade, including flight plan analysis and transition path construction, four-dimensional trajectory planning and re-planning, high-precision flight guidance commands calculation, FMS landing system, etc. The theoretical methods described in the book have been verified by pre-research and practical engineering projects, which are of great theoretical significance and engineering application value. This book is used as a reference for engineers engaged in flight control, flight guidance, and flight management research, as well as Masters and Ph.D.s in related disciplines.

*The ITIL Process Manual* James Persse, 2016-01-01 This practical guide is a great solution to address the key problem: how to implement ITIL and ISO 20000 when initial training has been completed. It supports the basic approaches to the fundamental processes. Small to medium-sized companies will find the concise practical guidance easy to follow and implement. It avoids the complex enterprise-wide issues which are not required for many organisations. Each chapter has the following structure: Improvement activities, Process inputs and outputs, Related processes, Tools and techniques, Key Performance Indicators, Critical Success Factors, Process Improvement roles, Benefits of effective Process Implementation, challenges and considerations, Typical assets and artefacts of an Improvement program. *A Flight Attendant's Essential Guide* Colin C. Law, 2019-08-15 A Flight Attendant's Essential Guide is written for airline executives, university lecturers who specialize in the airline industry, and for undergraduate students preparing for a career as a flight attendant. Those working in passenger aircraft, airport, as well as general communications at an airport or aircraft, can benefit from this book through a thorough understanding of the responsibilities of flight attendants. This textbook primarily focuses on the passenger aspect of in-flight service, including operations and communication skills, and how flight attendants interact with passengers at each phase of a flight.

*Advances in Aerospace Guidance, Navigation and Control* Bogusław Dołęga, Robert Głębocki, Damian Kordos, Marcin Żugaj, 2017-12-15 The first three CEAS Council of European Aerospace Societies Specialist Conferences on Guidance, Navigation and Control (CEAS EuroGNC) were held in Munich, Germany, in 2011; in Delft, Netherlands, in 2013; and in Toulouse, France, in 2017. The Warsaw University of Technology (WUT) and the Rzeszów University of Technology (RZUT) accepted the challenge of jointly organizing the 4th edition. The conference aims to promote scientific and technical excellence in the fields of Guidance, Navigation and Control (GNC) in aerospace and other fields of technology. The Conference joins together the industry with the academia research. This book covers four main topics: Guidance and Control, Control Theory, Application, Navigation, UAV Control and Dynamic. The papers included focus on the most advanced and actual topics.
