Thinking Animals Paul Shepard, 2011-07-01 In a world increasingly dominated by human beings the survival of other species becomes more and more questionable In this brilliant book Paul Shepard offers a provocative alternative to an us or them mentality proposing that other species are integral to humanity's evolution and exist at the core of our imagination This trait he argues compels us to think of animals in order to be human Without other living species by which to measure ourselves Shepard warns we would be less mature care less for and be more careless of all life including our own kind

After Eden: A Short History of the World John Charles Chasteen, 2023-11-14 To solve the problems of the twenty first century historian John Charles Chasteen argues that we must first know our shared human story In After Eden prominent Latin American historian John Chasteen presents a concise down to earth fast paced narrative of world history from the Big Bang to the present animated by stories of people from all walks of life and enriched by insightful analysis and the author's extensive world travel To tackle today's major problems of global inequality and environmental degradation Chasteen argues that we must first understand our shared past both the violent and cruel dimensions humanity's inhumanity to itself and the aspirational ones the creation of universal religions and ethical systems the birth of the ideas of individual liberty and freedom the resistance to the excesses of global capitalism the civil rights and decolonization movements and the environmental and social justice movements of today For Chasteen ultimate success hinges on our ability to recognize from our past experiences what is needed for us to live cooperatively and most critically the ways we educate our young people

From the Axial Age to the Moral Revolution: John Stuart Glennie, Karl Jaspers, and a New Understanding of the Idea E. Halton, 2014-07-04 In 1873 John Stuart Glennie elaborated a theory of the moral revolution to characterize the historical shift from roughly 600 BCE in a variety of civilizations as part of a critical theory of history This book brings light to the now eclipsed theory and offers new contexts and understandings of the phenomenon

Power of Development Jonathan Crush, 2005-07-22 Post colonial post modern and feminist critiques have challenged the ways we theorise and practice development Development is not just the conclusion of economic logic its histories reveal a legacy of contested power illuminating the contemporary battlefields of knowledge These essays explore the language of development its rhetoric and meaning within

different political and institutional contexts The contested ideas behind world development are explained with illustrative material sensitive to place and time chiefly drawn from Asia Africa and Latin America This book examines the power of development to imagine new worlds and to constantly reinvent itself as the solution to problems of national and global disorder The Theosophical Path Katherine Augusta Westcott Tingley,1922 *The Evolution of Future Consciousness* Thomas Lombardo,2006-06-23 Are there any unique qualities that humans possess that make us special within the world of nature Since the beginnings of recorded history we have pondered this question What if many of humanitys highest qualities and unique achievements such as technology civilization morals self consciousness freedom of choice religion and science are all built upon a single distinctive human capacity It may be that our highly evolved mental power to envision and think about the future is at the core of our greatest accomplishments and most unique human attributes In *The Evolution of Future Consciousness* psychologist and futurist Tom Lombardo examines the human ability to be conscious of the future to create ideas images goals and plans about the future to think about these mental creations and use them in directing ones actions and ones life In the opening chapter he looks at the psychology of future consciousness and its values and benefits as well as ways to enhance this human ability Subsequent chapters describe the emergence of future consciousness in pre historic times and how it was critical in the development of love and bonding the family tools and human aggression and hunting the central importance of the future and time in early myths religions and classical philosophy and the rise of modern futurist thinking covering the Renaissance the Scientific Revolution the Western Enlightenment and the Romantic counter reaction The book concludes with Darwin and how the theory of evolution revolutionized humanitys conception of both the past and the future In its companion volume *Contemporary Futurist Thought* Tom Lombardo completes his survey of the historical development of future consciousness discussing significant ideas and approaches to the future in the last century including science fiction future studies and an extensive array of recent theories and paradigms of the future Solving Puzzles with Neural Creativity Marcel Danesi,2025-06-13 This book takes an in depth look at the tradition of solving puzzles and considers the psychological cause and effect of the Aha moment that familiar flash of sudden insight Everyone loves a good puzzle but why is this so Is it because puzzles provide a form of escapism from the routines of daily life Or do they reveal something fundamental or perhaps even primal about human cognition and consciousness In this book Marcel Danesi considers the importance of puzzles to the study of mind and culture and explores how they stimulate creative regions of the brain Danesi explores the history of classic puzzles across time and cultural spaces and examines the psychological link between puzzle solving mental imagery and visualization He takes an in depth look at the difference between puzzles and games based on systematic reasoning as well as the role of language meaning and structure in the solving of riddles Overall the book puts forward the idea that puzzles provide cognitive data on how the brain might function when processing information via the neurocircuitry that supports creativity Examining all kinds of puzzles including verbal nonverbal and mathematical Solving

Puzzles with Neural Creativity will be of great interest to students and scholars of psychology cognitive science neuroscience and anthropology Littell's Living Age Eliakim Littell, Robert S. Littell, 1884 The Neglected Ape Biruté M.F. Galdikas, R.D. Nadler, N. Rosen, Lori K. Sheeran, 2013-11-11 The orangutan is the most highly endangered species of great ape. Orangutans are threatened by deforestation, poaching, the illegal pet trade, and the isolation and fragmentation of dwindling wild populations. Their conservation is impeded by certain aspects of their ecology, e.g. a rain forest habitat and certain features of their life history, e.g. an eight to twelve year interbirth interval. Added to the U.S. Endangered Species List in 1970, the orangutan is now clearly on the road to extinction. The number of wild orangutans in Borneo and Sumatra is currently estimated to have decreased to between 12,300 and 20,571 individuals. Only 2% of original orangutan habitat is protected, and some of these areas are now being destroyed. Clearly, attention to ecology, demography, censusing, rehabilitation, and conservation is essential if the orangutan is to survive in the wild beyond the next century. The protection of orangutans is a complex, multifaceted problem involving such pressing issues as human poverty, overpopulation, and the economic development of Southeast Asia. Although the orangutan has been placed in Appendix I of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), more orangutans were sold illegally in Taiwan between 1990 and 1993 than are housed in all the world's zoos. In the past, scientific and public attention has centered on the African apes. For this reason, the sole Asian great ape, the orangutan, has been called the neglected ape Littell's Living Age, 1884.

Explaining Human Origins Wiktor Stoczkowski, 2002-06-20 Wiktor Stoczkowski, a palaeo-anthropologist, argues that the theories of human origins developed by archaeologists and physical anthropologists from the early nineteenth century to the present day are structurally similar to Western folk theories and to the speculations of earlier philosophers. Reviewing a remarkable range of thinkers writing in a variety of European languages, he makes a convincing argument for this case. Even though the book criticises the lack of development in theories of human origins, its conclusion is optimistic about the power of the scientific approach to deliver more reliable theories, but only if the influences of popular discourse on its thinking are properly identified. *Stone Age Present* William Allman, 1995-11-07 Have you ever wondered why men don't ask for directions? Why we react with anger to infidelity? Why we love music and art? Why war and racism still thrive in our most sophisticated cultures? In this fascinating synthesis of the disciplines of anthropology, psychology, linguistics, philosophy, and biology, William Allman shows us how our minds have evolved in response to challenges faced by our prehistoric ancestors and reveals how our brains continue to harbor that legacy in the present day. Scientists speculate that many of the problems of modern life, from obesity to war, arise because our Stone Age mind hasn't caught up with our technologically sophisticated world. But Allman also reveals how morality, rather than being the result of arbitrary convention, is deeply rooted in our need to cooperate, which has been essential to the survival of our species through its evolution. **Faith Vs. Science** Jerome Goddard, 2012-07-09 This is not a book on theology, nor is it a highly technical scientific analysis. It's really just a conversation.

between me and a hypothetical non hostile unbeliever My purpose is to help scientific people see that religion is not just for kooks and to help religious people see that science is not just for atheists Persons skilled in debate will quickly notice that I have utilized a variety of methods to advance my arguments such as logic rhetoric presentation of scientific experimental data and even narrative I realize this mixture of methods is in itself a fault and sometimes appears self contradictory However keep in mind that this book is written in a conversational tone In real life conversations people utilize a variety of methods to make their points That s what I m doing here opening up a reasonable educated conversation about God science and life itself in ways that work best for me

pleasures of hashish is captivated by the visionary intensity of LSD and after meeting the Dutch psychedelic guru Bart Huges attempts the ultimate head trip the bore hole As well as a selection of unseen archive photographs this edition includes a new postscript essays appendices and a 1967 interview with Bart Huges *The Lord's Day, or, Christian Sunday. Its Unity, History, Philosophy, and Perpetual Obligation. Sermons* Morris Joseph Fuller, 2024-02-28 Reprint of the original first published in 1883 The Age of Spectacular Death Michael Hviid Jacobsen, 2020-09-08 This book explores death in contemporary society or more precisely in the spectacular age by moving beyond classic studies of death that emphasised the importance of the death taboo and death denial to examine how we now do death Unfolding the notion of spectacular death as characteristic of our modern approach to death and dying it considers the new mediation or mediatisation of death and dying the commercialisation of death as a marketable commodity used to sell products advance artistic expression or provoke curiosity the re ritualisation of death and the growth of new ways of finding meaning through commemorating the dead the revolution of palliative care and the specialisation surrounding death particularly in relation to scholarship Presenting a range of case studies that shed light on this new understanding of death in contemporary culture The Age of Spectacular Death will appeal to scholars of sociology cultural and media studies psychology and anthropology with interests in death and dying

Representing and (De)Constructing Borderlands Weronika Łaszkiewicz, Grzegorz Moroz, Jacek Partyka, 2016-02-08 This volume stems from the assumption that broadly understood borderlands as well as peripheries provinces or uttermost ends of different kinds are abodes of significant culture generating forces From the academic point of view their undeniable appeal lies in the fact that they constitute spaces of mutual interactions and enable new cultural phenomena to surface grow or decline and as such are worth thorough and constant scrutiny However they also provide the setting for radical clashes between ideologies languages religions customs and as the media report every single day armies or guerrilla units Living within such areas of creative dynamics and destructive friction or visiting them even vicariously as the contributors to the volume do is tantamount to exposing oneself to a difference One's response to this difference either in the form of rejection or more preferably acceptance or a mixture of both is not merely an index of one's tolerance a platitudinised term itself that all too often hides an attitude of comfortable indifference but an affirmation of humaneness Borderlands are paradoxical if not aporetic loci They simultaneously connote territories on either side of a border in a literal sense and a vague intermediate state or region in a metaphorical sense Encapsulating the idea of border the term indicates both inescapable nearness and unavoidable or perhaps unbridgeable separateness The studies included in the volume focus on various aspects of borderland art and literature on analyses of selected works and on the peculiarities of cultural and literary representations Thus the borderland landscape both literal and metaphorical comes to be seen as a factor contributing to the emergence of new distinct and identifiable themes and motifs as well as theoretical frameworks
