Rodger I. Anderson, 2015-01-27 Claimants of paranormal abilities have always attracted controversy and fascination and sometimes rigorous study by scientists Charles Bailey an Australian medium was seemingly able to materialize different objects animate and inanimate under conditions which made it difficult to conceive how they could have been normally produced Sumitra Singh a woman of Northern India who in 1984 became subject to epileptic type seizures claimed to be possessed by spirits of the dead Franck Kluski was a Polish poet banker and physical medium who specialized in both human and animal materializations This biographical dictionary contains profiles of 330 psychics worldwide from Tony Agpaoa to Elenor Zugun each accompanied by a bibliography listing the primary sources consulted The primary focus is on those claimed psychics who have figured prominently in the history of the subject though some lesser known figures are included to show how rich varied and colorful that history has been The aim throughout is to present each case as fairly and dispassionately as the facts allow with a particular eye for accuracy in details and presentation The approach is historical not apologetic or accusatory making the work ideally suited as a permanent reference , *Phantasy, Image Consciousness, and Memory (1898-1925)* Edmund Husserl, 2006-01-17 This is the first English translation of Husserliana XXIII the volume in the critical edition of Edmund Husserl's works that gathers together a rich array of posthumous texts on representational consciousness The lectures and sketches comprising this work make available the most profound and comprehensive Husserlian account of image consciousness They explore phantasy in depth and furnish nuanced accounts of perception and memory **The Esoteric**, 1896 **The Medium and Daybreak**, 1880 **The science of breath and the philosophy of the tatwas, tr. from the Sansk., with explanatory essays on nature's finer forces by R. *The Science of Breath and the Philosophy of the Tattvas* Rāma-Prasāda, 1894 **Psychic Psychology** John Friedlander, Gloria Hemsher, 2011-08-09 Two of America's most experienced and respected psychic teachers present their system of the subtle energy of interpersonal relationships in a book that will appeal to anyone wishing to understand and

improve their relationships within their families partnerships workplaces and wider communities This useful guide from two of America s preeminent psychics is unique in its focus on individual psychology and interpersonal relationships It begins with simple meditations during which practitioners learn how to recognize their own psychic energy and also determine if that energy is constrained Psychic Psychology shows how to free energy through such tools as grounding clearing psychic enmeshment and finding the space from which to respond most openly resourcefully and generously to life An entire chapter is devoted to exploring the specific energies men and women have based on their biological differences and helping them to deal with their own energy and that of the other sex Friedlander and Hemsher present the everyday usefulness of clairvoyant skills within a big picture where they explain that we create our reality but do not control it and that the personality like the soul is eternal and always growing The final section describes how psychic skills can be applied in real world contexts which are often ambiguous and contradictory The book explores common issues such as dealing with selfdoubt without jumping to unwarranted blind confidence and how to communicate effectively with clear boundaries *The Theosophist* ,1884 *Why Things Matter* David M. Black,2011-04-08 In this book David M Black asks questions such as why do we care and what gives our values power using ideas from psychoanalysis and its adjacent sciences such as neuroscience and evolutionary biology in order to do so *Why Things Matter* explores how the comparatively new scientific discipline of consciousness studies requires us to recognize that subjectivity is as irreducible a feature of the world as matter and energy Necessarily inter disciplinary this book draws on science philosophy and the history of religion to argue that there can be influential values which are not based exclusively on biological need or capricious life style choices It suggests that many recent scientific critics of religion including Freud have failed to see clearly the issues at stake This book will be key reading for psychoanalysts and psychotherapists as well as counsellors with an interest in the basis of religious feeling and in moral and aesthetic values The book will also be of interest to scholars of psychoanalysis philosophy and religion **Phenomenology of Perception** Carmelo Cali,2017-03-06 *Phenomenology of Perception* Theories and Experimental Evidence reconstructs and reviews the phenomenological research of the Brentano School Edgar Rubin David Katz Albert Michotte and Gestalt psychology Phenomenology is commonly considered a philosophy of subjective experience but this book presents it instead as a set of commitments for philosophy and science to discover the immanent grammar underlying the objective meaning of perception Pioneering experimental results on the qualitative and quantitative structures of the perceptual world are collected to show that contrary to the received assumption phenomenology can be embedded in standard science This book will therefore be of interest not only to phenomenologists but also to anyone concerned with epistemological and empirical issues in contemporary psychology and the cognitive sciences Encyclopedia of American Religions J. Gordon Melton,2003 This encyclopedia revised and expanded contains over 2600 descriptive entries on the religious and spiritual groups of the United States and Canada Cultural Distance in International Ventures Katiuscia Vaccarini,Francesca Spigarelli,Ernesto

Tavoletti, Christoph Lattemann, 2017-09-18 This book uses the concepts of both cultural and psychic distance to analyse managers' perceptions in international business settings with a specific focus on European and Chinese ventures in the green technology industry. The key concept of distance refers to the variations of cultures, languages, business practices, policies and regulations that distinguish different countries. Offering empirical case studies and theoretical refinements on how scholars can conceptualise and operationalise the psychic distance construct, the authors provide a comprehensive examination of European foreign direct investment (FDI) to China and Chinese FDI to Europe. Contributing to the Marie Curie scheme Partnering Opportunities between Europe and China in the Renewable Energy and Environmental Industries (POREEN), this book is an invaluable read for managers and practitioners.
