This new program emphasizes the importance of developing scientific literacy and an understanding of research and research methods. The program uses an inviting why focused framework that taps into students natural curiosity incorporating active learning and real life application to engage students. Psychological Science The Curious Mind embraces the guidelines released by the American Psychological Association APA's Introductory Psychology Initiative IPI in 2021. It provides an excellent framework for instructors who want to implement those guidelines in their Introductory Psychology courses and it provides students with the content and motivation to achieve the course's ultimate outcome an enduring foundational understanding of psychological science.

Psychological Science Under Scrutiny Scott O. Lilienfeld, Irwin D. Waldman, 2017-03-06

Psychological Science Under Scrutiny explores a range of contemporary challenges to the assumptions and methodologies of psychology in order to encourage debate and ground the discipline in solid science. Discusses the pointed challenges posed by critics to the field of psychological research which have given pause to psychological researchers across a broad spectrum of sub fields. Argues that those conducting psychological research need to fundamentally change the way they think about data and results in order to ensure that psychology has a firm basis in empirical science. Places the recent challenges discussed into a broad historical and conceptual perspective and considers their implications for the future of psychological methodology and research. Challenges discussed include confirmation bias the effects of grant pressure false positive findings overestimating the efficacy of medications and high correlations in functional brain imaging. Chapters are authored by internationally recognized experts in their fields and are written with a minimum of specialized terminology to ensure accessibility to students and lay readers.
