A Handbook on Isaiah Jan de Waard, 1997-01-01 In this volume the first of a projected series on the Hebrew Bible de Waard aims to give translators better insight into the viewpoint of the textual critic to help them find a good base for translation Though of primary interest for translators students and scholars will also be pleased to find that de Waard summarizes the arguments and ratings of the Hebrew Old Testament Text Project Because the final report of the HOTTP was published in French and was the work of textual critics rather than translation specialists its valuable contribution was found to have practical limitations DeWaard s work is also valuable because it examines three major Jewish versions in addition to the Christian versions selected by the Project for study Future volumes are planned to cover other portions of the Hebrew Bible Old Testament

Seeing the Self Einar Øverenget, 2001-11-30 die Augen hat mir Husserl eingesetzt 1 he aim of Twentieth century phenomenology is to provide a non T psychologistic interpretation of subjectivity Husserl agrees with Frege to adopt psychologism is to give up truth But this should not prevent us from investigating the subjective perspective On the contrary Husserl thinks that an appropriate rejection of psychologism must be able to show how propositions are correlated to and grounded in subjective intuitions without thereby reducing them to psychological phenomena Obviously this calls for an interpretation of subjectivity that makes a sharp distinction between the subjective perspective and the psychological realm Phenomenology is devoted to the development of a notion of subjectivity that is in accordance with our experience of the world A fundamental tenet of phenomenology is that philosophy should not dispute this experience but rather account for it Hence phenomenology must avoid a notion of subjectivity in which it becomes a problem to account for how a subject can ever hook up with the world In other words a phenomenological interpretation of subjectivity must radically disassociate itself from what is often referred to as a worldless Cartesian subject a res cogitans But neither can an interpretation of SUBjectivity consistently advocate a position according to which the human order is described only in the categories appropriate to the physical order Such an interpretation is obviously not compatible with the phenomenal basis for undertaking this very interpretation that is our experience of the world

Translation, the Canon and its Discontents Miguel Ramallete Gomes, 2017-08-21 This collection addresses the complex process by which

translation and other forms of rewriting have contributed to canon formation revision destabilization and dismantlement Through the play between version and subversion which is inherent to any form of rewriting these essays focusing on translations since the sixteenth century down to the present day stress the role of translation and adaptation as potentially transformative mediations capable of shaping and undermining identities Such manipulation is deeply ambivalent since it can be used as a means of disseminating the ideology of oppressive regimes at the expense of the source text but it can also serve to garner attention to marginalised texts This tense interplay between political social and aesthetic purposes almost inevitably generates discontents which may turn out to be the outcome of translation in general However discontent is a relational concept depending on where one stands in the field of competing positions that is the canon **The New**
