Protective Behaviours And Activities:

Protective Behaviours Simon Sneath, Anna Hicks, Jodie Bodsworth, Anna Carter, 2009 Protective Behaviours is a practical resource that has evolved from the tried and tested ideas and experience of a group of teachers The book contains whole lesson plans and lists of activity suggestions which can be adapted to suit children's ages and needs and are intended as a reference for using the Protective Behaviours process It will help children to Make safer choices Stand up to bullying behaviours Deal with transition and change Cope with divorce loss and separation Develop a vocabulary of feelings The activities are linked to different themes and coded to suggest suitable age groups and group sizes The book includes a brief explanation of the Protective Behaviours process

Teaching Protective Behaviours to Young Children Carolyn Gelenter, Nadine Prescott, Belinda Riley, 2017-07-05 This programme aims to provide children aged 4-7 years with awareness and strategies for keeping safe Although it may be difficult to accept children and young people from any community including those with disabilities can be put at risk of harm abused or hurt regardless of their age gender religion or ethnicity All children have the right to be safeguarded from abuse or neglect so they have the opportunity to reach their potential and be successful adults Protective behaviours teaches children to develop an awareness of personal safety helps them to identify and express their feelings make choices and solve problems First Steps to Safety has taken the core protective behaviour principles and created a teaching framework with overarching aims with supporting lesson plans resources and activities in a 10 week programme that can be picked up and used by anyone in school wanting to empower children and young people of any age and any capability to develop personal safety The information and strategies provided to children are generic and applicable across a range of situations that may arise for example bullying internet safety being harmed feeling sad or feeling unsafe Sessions include my body parts showing my feelings my body thoughts and feelings all go together feeling safe behaviour choices to empower children to feel safe and know they have a right to feel safe to give children the confidence and ability to assertively manage their own safety to children the skills to take responsibility for their own bodies thoughts feelings and behaviour to enable children with a range of communication abilities to ask for help for children to have awareness of their body thoughts feelings and behaviour have a vocabulary to express how their thoughts and feelings affect their bodies know the early warning signs for feeling unsafe know they can make different behaviour choices based on feelings and know who good people are to go to for help and how to ask for help

Protective Behaviours Step by Step Beth Melican, 1996

Handbook of Health Behavior Research I David S. Gochman, 1997-08-31 The primary objective of this Handbook is to provide statements about health behaviour research as a basic body of knowledge moving into the 21st century It is expected that the Handbook will remain in use and current through 2005 at least The Handbook presents a broad and representative selection of mid 1990s health behaviour findings and concepts in a single work While texts and books of readings are available in related areas such as health psychology medical anthropology medical sociology

behavioural health behavioural risk factors and changing health behaviours none of these works was intended to address basic research generated knowledge of health behaviour and none was intended to transcend individual disciplines Accordingly none of these works presents a broad and representative spectrum of basic health behaviour research reflecting multidisciplinary activities One work with a title identical to this one but for one word the Handbook of Health Behaviour Change Shumaker et al 1990 deals almost exclusively with applications This Handbook thus presents the reader with the state of the art in health behaviour research something not found elsewhere

The Handbook of Behavior Change Martin S. Hagger, Linda D. Cameron, Kyra Hamilton, Nelli Hankonen, Taru Lintunen, 2020-07-15 Social problems in many domains including health education social relationships and the workplace have their origins in human behavior The documented links between behavior and social problems have compelled governments and organizations to prioritize and mobilize efforts to develop effective evidence based means to promote adaptive behavior change In recognition of this impetus The Handbook of Behavior Change provides comprehensive coverage of contemporary theory research and practice on behavior change It summarizes current evidence based approaches to behavior change in chapters authored by leading theorists researchers and practitioners from multiple disciplines including psychology sociology behavioral science economics philosophy and implementation science It is the go to resource for researchers students practitioners and policy makers looking for current knowledge on behavior change and guidance on how to develop effective interventions to change behavior

Exploring the Interaction between Health-promoting and Health Risk Behaviours in Health Huixuan Zhou, Feng Jiang, Yi-lang Tang, 2024-05-28 Health related behaviours play positive or negative roles in people's health For instance health risk behaviours such as sedentary behaviours e g binge watching TV and playing computer games the use of alcohol tobacco or other substances and lack of sleep have been found to negatively affect the physical and mental health of people On the other hand some studies show that health promoting behaviours such as physical activity and healthy dietary habits can mitigate or reverse the negative effects of health risk behaviours on health outcomes In the meantime some studies indicate that the harmful effects of some health risk behaviours may not be mitigated by health promoting behaviours For instance some studies show that sedentary behaviours and physical activity are independently associated with some physical and mental health outcomes interventions to increase physical activity with and without decreasing sedentary time lead to different health outcomes Clearly more research is needed to show the interaction between health promoting behaviours and health risk behaviours in health which could shed light on the management of health related behaviours

Sustainable Tourism IX J. Casares, F. Pineda, 2020-09-28 Today tourism is an important component of development not only in economic terms but also for knowledge and human welfare Tourism today is an activity accessible to

a growing number of people The phenomenon has many more advantages than disadvantages New forms of economic development and increasing wealth of human societies depend on tourism Our knowledge of the world now includes a strong component due to tourism Human welfare has physiological and psychological elements which tourism promotes both because of the enjoyment of knowing new territories and increasing contacts with near or far away societies and cultures The tourism industry has nevertheless given rise to some serious concerns including social costs and ecological impacts Many ancient local cultures have practically lost their identity Their societies have orientated their economy only to this industry Both the natural and cultural rural or urban landscapes have also paid a high price for certain forms of tourism These problems will persist if the economic benefit is the only target leading to economic gains that eventually become ruinous It is also important to consider that visitors nowadays are increasingly demanding in cultural and environmental terms Never before have transport and communication links been so important as today Natural ecosystems are now a rarity on the planet and ecologists talk today about socio ecosystems Given this tourism and environmental education are facing a major challenge Tourism also plays an important role in the natural environmental changes that are strongly affected by technological and social developments Natural changes are inherent in the Earth s ecosystem the ecosphere Also technological and social changes are inherent to mankind the noosphere and are now becoming widespread Cities are growing rapidly and industry requires increasingly larger areas Many traditional rural areas are being abandoned However many historic agricultural districts have maintained or even recovered their local population numbers through intelligent strategies of tourism focused on nature and rural culture Natural landscapes and biodiversity are becoming increasingly appreciated The tourism industry must be able to respond to these aspirations The 9th International Conference on Sustainable Tourism had the aim of finding ways to protect the natural and cultural landscape through the development of new solutions which minimise the adverse effects of tourism A selection of the papers presented at the meeting form this volume

Physical Activity and Children Noemie P. Beaulieu, 2008 Physical inactivity is a major risk factor for developing coronary artery disease It also increases the risk of stroke and such other major cardiovascular risk factors as obesity high blood pressure low HDL good cholesterol and diabetes The American Heart Association recommends that children and adolescents participate in at least 60 minutes of moderate to vigorous physical activity every day Increased physical activity has been associated with an increased life expectancy and decreased risk of cardiovascular disease Physical activity produces overall physical psychological and social benefits Inactive children are likely to become inactive adults This book presents new research in the field from around the world

Transforming Protection Rachel Julian, 2025-06-26 Unarmed Civilian Protection UCP is practised globally by civilians protecting fellow civilians without the use of weapons This book argues that while UCP is useful and transformative in its own right its principles and values mean it has the potential to transform our responses in a range of social contexts where there is violence Chapters investigate the relationship between power

protection and peace community led aspects of protection and successful behaviours and actions in protection The book argues that when UCP is accepted as a viable form of protection from direct violence there are wider implications for communities security and violence In turn these insights can provide us with new models for ensuring people s safety

appraisal of evidence in the clinical chapters make this book distinctive in its field as do the treatment recommendations which are based on the discussion of the best available evidence using a question driven approach and a common structure on dealing with efficacy drawbacks and implications for clinical practice

Building a Cybersecurity Culture in Organizations
Isabella Corradini, 2020-04-29

This book offers a practice oriented guide to developing an effective cybersecurity culture in organizations. It provides a psychosocial perspective on common cyber threats affecting organizations and presents practical solutions for leveraging employees' attitudes and behaviours in order to improve security. Cybersecurity as well as the solutions used to achieve it has largely been associated with technologies. In contrast, this book argues that cybersecurity begins with improving the connections between people and digital technologies. By presenting a comprehensive analysis of the current cybersecurity landscape, the author discusses, based on literature and her personal experience, human weaknesses in relation to security and the advantages of pursuing a holistic approach to cybersecurity and suggests how to develop cybersecurity culture in practice. Organizations can improve their cyber resilience by adequately training their staff. Accordingly, the book also describes a set of training methods and tools. Further ongoing education programmes and effective communication within organizations are considered, showing that they can become key drivers for successful cybersecurity awareness initiatives. When properly trained and actively involved, human beings can become the true first line of defence for every organization.
