scientists the relevance of state of the art mechanistic biology to diagnosis treatment and future opportunities for drug design is clearly explained The balance between science and clinical practice will ensure that this book makes a lasting contribution to the field A broad readership will find the book easy to access and a rich source of information on current best practice and evolving management strategies **Double Stars, Physical Properties and Generic Relations** B.

Hidayat,Zdenek Kopal,Jürgen H. Rahe,2012-12-06 The Bosscha Observatory in Lembang Java Indonesia celebrated in 1983 its 60th anniversary Since its foundation the physical properties of binary systems have formed a major research topic of this observatory Until 1970 the study of visual binaries and the determination of orbits received most emphasis Since then also the evolution of close binary systems such as X ray binaries Wolf Rayet binaries and binary pulsars has been researched with priority in Lembang It seemed thus appropriate that a Colloquium devoted to the study of binary systems be held in Lembang at the time of the Observatory's anniversary In the Colloquium the role of wide double and multiple systems received special emphasis not only because of the long tradition of visual binary research at Lembang but also because their role in documenting stellar evolution has been largely overlooked in recent decades and needs to be brought into focus with the information forthcoming from close binaries The Colloquium covered the physical properties of visual as well as close binary systems and their generic relations in the broadest possible sense It was sponsored by the International Astronomical Union as IAU Colloquium No 80 Double Stars Physical Properties and Generic Relations After the official opening ceremony the meeting started with a discussion on the future of astronomy in Asia The scientific sessions began with the V Bappu Memorial Lecture on the Evolution of Binary Systems presented by Z Kopal **Immunology and Liver** M.P. Manns,G.

Paumgartner,U. Leuschner,2012-12-06 In 1992 the Falk Symposium No 70 dealt with the topic Immunology and Liver At that time basic mechanisms of immunology as well as immunopathogenetic mechanisms in viral and autoimmune liver diseases were discussed Now 7 years later the Falk Symposium No 114 held in Basel Switzerland October 20 21 1999 Part I of the Basel Liver Week 1999 focused on immunology in autoimmune liver diseases In the first section basic mechanisms of autoimmunity are presented including the relevance of superantigens and the role of apoptosis A further topic is the latest developments concerning animal models for autoimmune diseases Recently the International Autoimmune Hepatitis Group newly defined and reclassified the syndrome of autoimmune hepatitis Autoimmune hepatitis is now identified and studied in all parts of the world including Asia and South America A special variant of autoimmune hepatitis was identified as one organ manifestation of the autoimmune polyendocrine syndrome type 1 a genetic disease caused by mutations in a single transcription factor Drug and hepatitis virus induced immune mediated liver diseases may serve as models for nonhepatic immune mediated disorders DNA technology has increased our knowledge of the immunogenetic background of autoimmune liver diseases Among the cholestatic immune mediated liver diseases significant progress has been made concerning primary biliary cirrhosis in particular regarding the identification of mitochondrial antigens and the characterisation of the immune

reactions directed at them The involvement of infectious agents in PBC as well as the definition of overlap syndromes is a particular focus for basic and clinical research in this area Concerning the therapy of autoimmune liver diseases corticosteroids and azathioprine remain the state of the art for autoimmune hepatitis while bile acids have become well established in treatment of primary biliary cirrhosis as well as primary sclerosing cholangitis New drugs in the future will include topical steroids such as budesonide and new immunosuppressive agents like mofetil mycophenolate Liver transplantation is the treatment of choice for end stage liver diseases all autoimmune liver diseases are among the best candidates for liver transplantation Hopefully new therapeutic strategies based on the results obtained from experimental models will become everyday clinical practice in the next decade Therefore this symposium concludes with a discussion
