

Emotional Intelligence Test

This test is aimed at ascertaining the ability of a person to handle emotions. It is highly dependent on a person's state of emotion development, but not on his/her cognitive ability. The relationship that develops between a person and those around him or her is usually influenced by the person's emotional intelligence.

This test is, therefore, valuable in ascertaining an individual's ability to relate well with others at the workplace especially if he/she occupies a managerial position. These tests are very important in the solution of social conflicts and hence can be used in behavior prediction at the workplace.

Integrity Test

This is usually employed during the identification of integrity levels in a person, and it results in the patterns of behavior being quantified. This may facilitate the prediction of dishonesty behavior among the employees. This test has the capability of exposing sabotage and unethical behavior that may affect the performance of the employees. Personality integrity, which is one form of integrity test has been found to be successful in predicting employee cooperation at the workplace (Messick, 2005).

Psychological Testing for Pre-employment or Retention

Apart from being used in employee selection, some tests are crucial in employee development processes. Myers-Briggs Type Indicator (MBTI) tests, for example, are used in employment performance evaluation to enhance advancement.

Pre-employment situations may demand the application of both emotional intelligence and integrity tests to ascertain the preparedness of the prospective employees to occupy positions in the organizations. It should be noted that when the selection process is carried out effectively there is always a higher retention rate (Spetor, 2008).

Validity and Reliability Issues of Psychological Testing

Psychology tests that are liable and valid contribute positively to the success of organizations. Reliability refers to the consistency of the results while validity on the
