Understanding Test and Exam
Results Statistically Kaycheng Soh, 2016-08-09 This book shares the goal of the classic text How to Lie with Statistics namely
preventing and correcting statistical misconceptions that are common among practitioners though its focus is on the
educational context It illustrates and discusses the essentials of educational statistics that will help educational practitioners
to do this part of their job properly i.e. without making conceptual mistakes The examples are cast in the school classroom
contexts based on realistic rather than theoretical examples The strongest aspect of the work or author's view is that the
author can put himself in the shoes of teachers and make the work a very practical guide for teachers and school leaders As a
very experienced educator and researcher the author knows very well about the knowledge skills that are essential for the
professional development of teachers He is able to explain the statistical and measurement concepts in plain language and
with examples that are highly relevant to the target audience In addition the author also conveyed an important message to
the target audience throughout the work by pointing out the mistakes and misunderstandings of the interpretation of test

scores and measurement design The author reminds the audience about the importance of proper use of tests and test scores when teachers and school leaders make any education decisions which has much implication on the professional integrity of teachers and school leaders Dr Joyce Kwan The Education University of Hong Kong Hong Kong This book covers all the statistical tools for analyzing educational data and provides examples to explain the ideas Chapters 10 17 are practical data analysis in educational data that helps readers have a better understanding of the procedure to analyze the data Dr Alpha Ling The Education University of Hong Kong Hong Kong It looks like a very interesting book with attractive topics and practical problems in educational statistics Though the topics remind me of the classic book How to Lie with Statistics this book aims at preventing and correcting statistical misconceptions in educational context Dr Zhu Ying National Institute of Education Nanyang Technological University Singapore
