Know the definition of developmental psychology.

In Piaget's theory, define the following:

Schema: A framework that organizes and interprets information

Assimilation: The interpretation we take from our new experiences in terms of our existing schemas

Accommodation: The adaption of our current understandings to incorporate new information

Object permanence: The awareness that things continue to exist even when not perceived

Conservation: The principle that properties such as volume, mass, and number remain the same despite changes in shape

What is egocentrism?

Egocentrism is the preoperational child's difficulty in taking another's point of view.

What is meant by "theory of mind"? What disorder is associated with an absence of theory of mind?

Theory of mind is someone's ideas about their own and others' mental states and the disorder associated with an absence of theory of mind is autism spectrum disorder.

What is attachment, and what elements are involved in its development?

Attachment is an emotional tie with another person and how parents care for their children is involved in its development.

Know the four parenting styles identified in the text. Which is associated with the best outcomes?

- Authoritarian: coercive parents that set the rules and expect obedience
- Permissive: unrestraining parents that make few demands and use little punishment
- Negligent: uninvolved parents that are neither demanding nor responsive and often do not desire a relationship with their children
- Authoritative: confrontive parents that are both demanding and responsive; they often set rules but they allow some exceptions

The authoritative parenting style is associated with the best outcomes.

Be familiar with Erik Erikson's stages of psychosocial development. (See table in text, p. 89)
