

## Connect ETL

Transforming and delivering application data for analytics in hybrid cloud environments

### Integrate data across the organization

Connect ETL integrates all data across an organization from RDBMS, mainframe, NoSQL, the cloud, and more. Connect ETL delivers a complete solution by also integrating with visualization tools and EDWs. Load aggregated datasets to all major MPP applications or load data feed directly into a data visualization tool. Perform a variety of tasks with Connect ETL such as:

- Connecting legacy data – mainframe, IBM i, Teradata, Nebecza – to the cloud and other next generation platforms
- Leverage complex COBOL and mainframe copy books for metadata and interpretation
- Get full insight into your data lineage for reporting and compliance even as data volumes and your data pipelines grow
- Access a wide variety of analytics databases and BI platforms including Snowflake, Teradata, Vertica, Oracle, Tableau, NoSQL

### Smarter ETL pipelines

ETL processes are an integral part of any business' data pipeline. However, traditional ETL tools cannot keep up with growing volume and variety of data that is the norm in today's enterprise. As a result, organizations are forced to spend valuable resources to constantly tune for performance or push transformations down to the database. These efforts drive exponential costs and complexity that impede their ability to achieve strategic business objectives.

Connect ETL is high-performance, self-tuning ETL software that delivers speed and flexibility, along with significantly lower cost and complexity for developing and maintaining data integration environments. It removes the need for costly database staging areas or manual processes. Whether on premises or in the cloud, Connect ETL processes transformations on the fly and enables you to create your own data blends for consistent, sustainable performance.

### Improved performance for maximum impact

Connect ETL is the only data integration tool with Intelligent Execution, a self-tuning engine that dynamically selects the most efficient algorithms based on the data structures and systems attributes at run-time. Get the best performance possible whether the job is on premises or in the cloud. Experience up to 10X faster performance and save hundreds of hours of development in comparison to traditional ETL tools.

### Design once, deploy anywhere

With Connect ETL visually design your jobs once and deploy them anywhere – Linux, Unix, Windows – on premise or in the cloud. You can even deploy those same jobs – without any coding or tuning – on Apache Spark or Hadoop MapReduce, with a Connect for Big Data license. Connect ETL offers a template-based design for high-performance ETL, SQL migration/Database ELT offload and mainframe data movement.
