Knowledge-Based Decision Support for Integrated Water Resources Management with an Application for Wadi Shueib, Jordan David Riepl,2014-05-13 This book takes a two staged approach to contribute to the contemporary Integrated Water Resources Management IWRM research First it investigates sub basin scale IWRM modelling and scenario planning The Jordanian Wadi Shueib is used as exemplary case study Then it develops a framework to collaboratively manage planning and decision making knowledge on the basis of semantic web technologies Future IWRM initiatives can benefit from the valuable insights achieved in the presented study **Economic Inequality and Higher Education** Stacy Dickert-Conlin,Ross Rubenstien,2007-06-21 The vast disparities in college attendance and graduation rates between students from different class backgrounds is a growing social concern Economic Inequality and Higher Education investigates the connection between income inequality and unequal access to higher education and proposes solutions that the state and federal governments and schools themselves can undertake to make college accessible to students from all backgrounds Economic Inequality and Higher Education convenes experts from the fields of education economics and public policy to assess the barriers that prevent low income students from completing college For many students from disadvantaged socioeconomic backgrounds the challenge isn t getting into college but getting out with a degree Helping this group will require improving the quality of education in the community colleges and lower tier public universities they are most likely to attend Documenting the

extensive disjuncture between the content of state mandated high school testing and college placement exams Michael Kirst calls for greater alignment between K 12 and college education Amanda Pallais and Sarah Turner examine barriers to access at elite universities for low income students including tuition costs lack of information and poor high school records as well as recent initiatives to increase socioeconomic diversity at private and public universities Top private universities have increased the level and transparency of financial aid while elite public universities have focused on outreach mentoring and counseling and both sets of reforms show signs of success Ron Ehrenberg notes that financial aid policies in both public and private universities have recently shifted towards merit based aid away from the need based aid that is most helpful to low income students Ehrenberg calls on government policy makers to create incentives for colleges to increase their representation of low income students Higher education is often vaunted as the primary engine of upward mobility Instead as inequality in America rises colleges may be reproducing income disparities from one generation to the next Economic Inequality and Higher Education illuminates this worrisome trend and suggests reforms that educational institutions and the government must implement to make the dream of a college degree a reality for all motivated students **ISO 9000**
