Statistical Analysis for Pharmacology and the Biomedical Sciences A practical guide to the use of basic principles of
experimental design and statistical analysis in pharmacology Experimental Design and Statistical Analysis for Pharmacology
and the Biomedical Sciences provides clear instructions on applying statistical analysis techniques to pharmacological data
Written by an experimental pharmacologist with decades of experience teaching statistics and designing preclinical
experiments this reader friendly volume explains the variety of statistical tests that researchers require to analyze data and
draw correct conclusions Detailed yet accessible chapters explain how to determine the appropriate statistical tool for a
particular type of data run the statistical test and analyze and interpret the results By first introducing basic principles of
experimental design and statistical analysis the author then guides readers through descriptive and inferential statistics
analysis of variance correlation and regression analysis general linear modelling and more Lastly throughout the textbook
are numerous examples from molecular cellular in vitro and in vivo pharmacology which highlight the importance of rigorous
statistical analysis in real world pharmacological and biomedical research This textbook also Describes the rigorous
