Tabulate Differences Between Nsfas And Other Student Loans:

The Youth Dividend Jan H. Hofmeyr, 2012 **Higher Education**, 2023-11-02 COVID wrought havoc on the world's economic systems. Higher education did not escape the ravages brought on by the pandemic as institutions of higher education around the world faced major upheavals in their educational delivery systems. Some institutions were prepared for the required transition to online learning. Most were not. Whether prepared or not, educators rose to the challenge. The innovativeness of educators met the challenges as digital learning replaced the face-to-face environment. In fact, some of the distance models proved so engaging that many students no longer desire a return to the face-to-face model. As with all transitions, some things were lost while others were gained. This book examines practice in the field as institutions struggled to face the worst global pandemic in the last century. The book is organized into four sections: Perils and Promises, The State of Online Education, Goals and Challenges of Online Learning, and Innovations in the Age of COVID. It presents various perspectives from educators around the world to illustrate the struggles and triumphs of those facing new challenges and implementing new ideas to empower the educational process. These discussions shed light on the impact of the pandemic and the future of higher education post-COVID. Higher education has been forever changed and higher education as it once was may never return. While many questions arise, the achievements in meeting and overcoming the pandemic illustrate the creativity and innovativeness of educators around the world who inspired future generations of learners to reach new heights of accomplishment even in the face of the pandemic.

Higher Education Financing in East and Southern Africa Pundya Pillay, 2010. This nine-country study of higher education financing in Africa includes three East African states: Kenya, Tanzania, and Uganda; five countries in southern Africa: Botswana, Lesotho, Mozambique, Namibia, and South Africa; and an Indian Ocean island state, Mauritius. *Higher Education Financing in East and Southern Africa* explores trends in financing policies, paying particular attention to the nature and extent of public sector funding of higher education, the growth of private financing including both household financing and the growth of private higher education institutions, and the changing mix of financing instruments that these countries are developing in response to public sector financial constraints. This unique collection of African country case studies draws attention to the remaining challenges around the financing of higher education in Africa but also identifies good practices, lessons, and common themes.

Social Justice and Education in the 21st Century Willie Pearson Jr., Vijay Reddy, 2021-04-10. The world is not an equal place. There are high and low income countries and high and low income households. For each group, there are differential educational opportunities leading to differential educational outcomes and differential labor market opportunities. This pattern often reproduces the privileges and inequalities of groups in a society. This book explores this differentiation in education from a social justice lens. Comparing the United States and South Africa, this book analyzes each country's developmental thinking on education from human capital and human rights approaches in both primary and higher education. From School to Higher Education? Michael Cosser, Jacques Du Toit, 2002 This substantive report is essential reading for those involved in higher education planning and policy making *Low-Income Students, Human Development and Higher Education in South Africa* Melanie Walker, Monica McLean, 2022-07-15 This book explores learning outcomes for low income rural and township youth at five South African universities The book is framed as a contribution to southern and Africa centred scholarship adapting Amartya Sen s capability approach and a framework of key concepts capabilities functionings context conversion factors poverty and agency to investigate opportunities and obstacles to achieved student outcomes This approach allows a reimagining of inclusive learning outcomes to encompass the multi dimensional value of a university education and a plurality of valued cognitive and non cognitive outcomes for students from low income backgrounds whose experiences are strongly shaped by hardship Based on capability theorising and student voices the book proposes for policy and practice a set of contextual higher education capability domains and corresponding functionings orientated to more justice and more equality for each person to have the opportunities to be and to do what they have reason to value The book concludes that sufficient material resources are necessary to get into university and flourish while there the benefits of a university education should be rich and multi dimensional so that they can result in functionings in all areas of life as well as work and future study the inequalities and exclusion of the labour market and pathways to further study must be addressed by wider economic and social policies for inclusive learning outcomes to be meaningful and that universities ought to be doing more to enable black working class students to participate and succeed Low Income Students Human Development and Higher Education in South Africa makes an original contribution to capability scholarship conceptually in theorising a South based multi dimensional student well being higher education matrix and a rich reconceptualisation of learning outcomes as well as empirically by conducting rigorous longitudinal in depth mixed methods research on students lives and experiences in higher education in South Africa The audience for the book includes higher education researchers international capability scholars practitioners and policy makers [Transforming Universities in South Africa](#) , 2020-08-31 The idea of transformation in higher education underpins all policy documents academic literature and on going debates in South Africa Transforming Universities in South Africa Pathways to Higher Education Reform responds to the pressing need to comprehensively review the post apartheid experience and assess where South Africa s higher education stands across the continent and globally particularly within the country s efforts to overcome decades of socio economic imbalances It addresses the question of whether South Africa s transformation strategy from apartheid to democracy was simply a symbolic new flag raising and new anthem singing exercise reflecting a transition akin to those limited decolonization projects elsewhere in the world or whether something more fundamental was possible and was achieved with political and policy implications for other countries in Africa and globally This volume s ultimate purpose is to

provide a basis for imagining new futures in which South Africa higher education in the context of Africa and the global world takes centre stage

Financing Access and Equity in Higher Education, 2019-02-11 The demand for higher education worldwide is booming Governments want well educated citizens and knowledge workers but are scrambling for funds The capacity of the public sector to provide increased and equitable access to higher education is seriously challenged What are the on the ground realities of developing financial resources and policies to meet the twin goals of equity and access without jeopardizing quality This volume provides in depth reports from selected countries and sub regions Morocco Korea England Uganda Poland Oman East and southern Africa Southeast Asia Brazil and Egypt Each chapter is written by a seasoned educator participating in the Fulbright New Century Scholar program for 2007 2008 Given the near universal constraints of declining resources but increasing enrollments the authors identify common trends such as the public private divide the privatization of the public sector and diversification of funding To address these issues the chapters examine a surprising variety of policy instruments such as means testing targeted subsidies cost sharing institutional aid student bursaries and tax exemptions

Contemporary Issues In Education ,2005-01-01 Following the warm reception given to *The Idea of Education* a volume of papers in this same Rodopi Series a second conference around similar themes was held at Oxford University and this book is the result This edited book provides the reader with a fairly representative coherent and cohesive statement of the 2003 Oxford conference Quoting the Chancellor of Paris University with regretting that in the old days lectures were more frequent but now the time taken for lectures is being spent in meeting and discussions our keynote Frank McMahon made the profound observation that some of the issues around education have been with us for a surprisingly long time Notwithstanding the longevity of some questions concerning education this book details and examines contemporary educational practice and theory and as such it is a very important work

The Dynamics of International Student Circulation in a Global Context ,2008-01-01 Student mobility is the most important factor in the internationalization of higher education In this book existing assumptions will be questioned that mobility is primarily South North and North North and that South South flows are rather marginal that the economic rationale has become so dominant that there are nearly no other motives to be found anymore and that the growing presence of national and international providers of higher education and opportunities for distance education reduce the need for international student mobility The dynamics of international student circulation will be analyzed on the basis of four countries Egypt India Indonesia and South Africa which are perceived to be primarily on the sending side of student mobility and Europe and the USA which are perceived to be primarily but not exclusively on the receiving side These case studies will be placed in the context of broader developments in the internationalization of higher education and related to definitions methodological issues and global data as used by UNESCO OECD and others This study has been undertaken by five scholars from different parts of the world in the context of the 2005 2006 New Century Scholars Programme Higher Education in the Twenty First Century of the Fulbright Programme The book will be of relevance for both researchers and practitioners on globalization and the internationalization of higher education

Journal of Higher Education in Africa ,2005

Online Teaching and Learning in the COVID-19 Era Felix Maringe,Otilia Chiramba,2023-11-30 This book examines the ongoing changes initially caused by the COVID 19 pandemic and the future prospects of teaching and learning in higher education institutions It focuses on the impact of online education on issues of learning equity and epistemic justice The transition from traditional face to face teaching to remote learning has exacerbated existing inequalities in epistemological access among higher education students

despite the shortcomings of the former in this regard The book features essays by African academics who reflect on the challenges of epistemological access during the sudden shift to hybrid blended and remote teaching and learning It specifically explores the question of equitable learning in diverse home contexts drawing on both theoretical and empirical studies conducted by the authors in South African universities and the region The chapters employ the conceptual framework of epistemic injustice to define and explore various forms of such injustice providing a basis for analyzing the implications of the transition to online pedagogy

Higher Education in the BRICS Countries Simon Schwartzman,Rómulo Pinheiro,Pundy Pillay,2015-03-24 In spite of

the increasing attention attributed to the rise in prominence of the BRICS Brazil Russia India China and South Africa countries few studies have looked at the ways in which broader social expectations with respect to the role of higher education across the BRICS have changed or not in recent years Our point of departure is that contrary to the conventional wisdom focusing on functionalistic perspectives higher education systems are not just designed by governments to fulfill certain functions but have a tendency for evolving in a rather unpredictable fashion as a result of the complex interplay between a number of internal and external factors In reality national higher education systems develop and change according to a complex process that encompasses the expectations of governmental agencies markets the aspirations of the population for the benefits of education the specific institutional traditions and cultures of higher education institutions and increasingly so the interests and strategies of the private firms entering and offering services in the higher education market This basically means that it is of outmost importance to move away from conceiving of universities or higher education as single monolithic actors or sector One way of doing this is by investigating a selected number of distinct but nonetheless interrelated factors or drivers which taken together help determine the nature and scope of the social compact between higher education its core actors and institutions and society at large government industry local communities professional associations

Practical Wisdom and Resilience Overcoming Downside Risk Kazuyo Hanai,Rangarirai Gavin Muchetu,Laban Kithinji Kinyua,Yoichi Mine,2025-05-24 This book classifies and assesses the real and perceived risks associated with both the Covid 19 pandemic and government responses to it in seven African countries DR Congo Kenya Ethiopia South Africa Tanzania Uganda and Zimbabwe based on large scale quantitative and qualitative surveys conducted in 2022 2024 It also elucidates the people s resilience in overcoming the risks within their political social and cultural context Although research on COVID 19 has been conducted in various fields particularly in the medical field the analytical perspective of this book is unique COVID 19 prevention policies are considered to have seriously increased other risks such as hunger other infectious diseases interruption of education and various types of human rights violations including increased conflict violence against civilians and political abuse Therefore this book argues that COVID 19 prevention policies as well as the pandemic itself should be regarded as the downside risk that triggers the deterioration of the other potential risks to vulnerable people Depicted here is the account of how trust in government community and family within the existing political social and cultural environment created pandemic politics as elections during the pandemic instrumentalized and politicized government prevention measures Economic distress threatened people s lives more than COVID 19 during lockdowns and severe behavioral restrictions and the spread of misinformation discouraged people from being vaccinated This book will be useful to policy makers and practitioners in international society who are preparing for the next pandemic based on the lessons learned from the COVID 19 pandemic
