Institutions have regimes policies that typically come from the top down and that are meant to align the efforts of workers with the goals and mission of an institution Institutions also have practices day to day behaviors performed by individual workers attempting to interpret the institution s regimes Tensions ensue as workers bring their own subjective experiences

and interpretations to the mix and amid those tensions we find politics and subsequently winners and losers in the workplace In Rhetorical Memory Stewart Whittemore explores these dynamics through a tightly focused workplace study that reveals how a team of technical communicators at a software company create and make use of organizational memory as part of their everyday work with the goal of better understanding issues trends and strategies in information management in the workplace That analysis identifies practical strategies technical communicators can use to implement rhetorically based practices for managing organizational memory and also establishes a clear connection in the workplace between political power and effective use of organizational memory This innovative piece of scholarship makes a meaningful contribution to the workplace literature in technical communication *Reports and Documents* United States. Department of Defense Authorization for Appropriations for Fiscal Year 1980 United States. Congress. Senate. Committee on Armed Services,1979 **The Functional Fire Company** J. Scott Thompson,2019-01-14 Scott Thompson

author of *The Functional Fire Company* says the functional fire company concept was not created but realized I realized after many attempts at trying to view success in the organization from the top down that it wasn't possible. Real indicators of success in the fire service come from the bottom up. A fire department's success is best judged at the company level. Many leaders and senior members have been taught the how but not the why and they don't understand the reasons for doing what they do. Thompson says, "Because firefighting is such a technical activity we must ensure that we are explaining why we do things while we demonstrate the how." It is essential that we develop critical thinking for solving fire suppression, rescue, and EMS problems. WHAT OTHERS ARE SAYING: Chief Scott Thompson combines his decades of experience and years of observation with today's leadership skills and provides a path for the successful fire department to follow. *The Functional Fire Company* will take you step by step from being an ordinary fire department to one which defines excellence. Rick Lasky, Fire Chief, Ret. Texas: "I found both motivation and a guide to implementation in this book. Chief Thompson has provided a deep resource for all ranks from creating culture to setting up training structure. I highly recommend this book to anyone with aspirations of making an organizational impact." Brian Brush, Chief Thompson has spent his entire career focusing on training and organizational effectiveness. *The Functional Fire Company* is his life's work wrapped up into a playbook which offers insight into how to make your organization perform at maximum proficiency. Experience, perspective, and a never-quit mentality are evident as Chief Thompson provides a unique view to solving problems in the modern-day fire service. Terry McGrath, Assistant Chief, Lewisville TX Fire Department: "This book offers a living breathing example that Chief Thompson's principles truly work. I hope you get as much value from this book as we have received from Chief Thompson's lessons and that you take what you learn back to your organization." Garrett Rice, The Colony Fire Department TX Battalion Chief, A Shift

Missionaries of Revolution Clarence Martin Wilbur, Julie Lien-ying How, 1989 During the 1920s the Soviet Union made a determined effort to stimulate revolution in China sending several scores of military and political advisers there as well as arms and money to influence political developments. The usual secrecy surrounding Soviet foreign intervention was broken when the Chinese government seized a mass of documents in a raid on the Soviet military headquarters in Peking in 1927. *Missionaries of Revolution* weaves together information gleaned from these documents with contemporary historical materials.
