

The Earth's Interior

The Earth's interior is made up of four layers (see diagram below)...

- **Crust:** Solid, outer layer of the Earth
- **Mantle:** Part solid, part melted layer beneath the crust
- **Outer Core:** Melted, metallic layer beneath the mantle
- **Inner Core:** Solid, metallic layer beneath the outer core

The outer-most part of the **mantle** is completely solid and is called the **rigid mantle**. The **rigid mantle** and the crust together make up the **lithosphere**. This solid **lithosphere** "floats" upon the melted part of the **mantle** beneath. This melted part of the **mantle** is called the **asthenosphere**. It is not completely melted into a liquid, it is thick and gooey, like chewed up bubble gum. We refer to this gooey asthenosphere as **plastic**.
