Introduction to Gabon Gilad James, PhD, Gabon is a small country located in Central Africa bordered by Cameroon to the north Equatorial Guinea to the northwest and the Republic of Congo to the east and south The country has a land area of 267 667 square kilometers with a population of approximately 2 2 million people The capital city Libreville is situated on the coast and is the largest city in the country Gabon s economy is heavily dependent on oil production which accounts for

approximately 80% of the country's export revenue. However, the government has made efforts in recent years to diversify the economy by encouraging investment in other sectors such as transportation, telecommunications, and tourism. Additionally, Gabon is home to a significant portion of the Congo Basin rainforest and has been recognized for its efforts to conserve and protect its natural resources. Despite challenges such as poverty and political instability, Gabon remains an important player in the region and has significant potential for economic growth and development in the future.

**The Geography of Contemporary China** Jing'ai Wang, Shunlin Liang, Peijun Shi, 2022-06-28. This textbook provides a comprehensive and very detailed insight into Chinese Contemporary Geography in English. It documents the geographical issues associated with China's rapid growth. Since initiating the reforms and open policy, China has achieved tremendous success. China's rapid growth is now a driving force in the global economy and is achieving unprecedented rates of poverty reduction. However, China also faces a number of sustainability and emerging challenges associated with rapid growth, such as growing regional disparities in terms of per capita income and social economic development, sustainable resource development, and issues related to regional and global economic integration. In addition, rapid economic growth has also brought about major challenges such as resource shortages, ecological and environmental destruction, land degradation, and frequent disasters. This book presents the authors' reflections. This lavishly illustrated book covers physical geography, history, and economic and political systems of the world's most populous country. The major focus is on geographical issues in China's contemporary development: agriculture, population, urbanization, resource, and energy, and environment. The lead author of the book has taught relevant courses in China for three decades and authored and edited multiple textbooks for Chinese students. This book will appeal to undergraduate students of geography and related disciplines with a regional focus on China and to the general reader who wants to learn different geographical aspects of modern China with little academic background in geography.
