Principles of Environmental Geochemistry G. Nelson Eby, 2016-04-20 Many geochemists focus on natural systems with less emphasis on the human impact on those systems Environmental chemists frequently approach their subject with less consideration of the historical record than geoscientists The field of environmental geochemistry combines these approaches to address questions about the natural environment and anthropogenic effects on it Eby provides students with a solid foundation in basic aqueous geochemistry before discussing the important role carbon compounds isotopes and minerals play in environmental issues He then guides students through how these concepts apply to problems facing our atmosphere continental lands and oceans Rather than broadly discussing a variety of environmental problems the author focuses on principles throughout the text leading students to understand processes and how knowledge of those processes can be applied to environmental problem solving A wide variety of case studies and quantitative problems accompany each chapter giving each instructor the flexibility to tailor the material to his her course Many problems have no single correct answer illustrating the analytical nature of solving real world environmental problems

Atmospheric Ammonia Mark Sutton, Stefan Reis, Samantha Baker, 2008-12-30 Anthropogenic emissions of ammonia cause a host of environmental impacts including loss of biodiversity soil acidification and formation of particulate matter in the atmosphere Under the auspices of the UNECE Convention on Long Range Transboundary Air Pollution around 80 international experts met to review the state of scientific knowledge This book reports their analysis It concludes that threshold levels for ammonia effects have been underestimated and sets new values it assesses the independent evidence to verify reported reductions in regional ammonia emissions and it reviews the uncertainties in modelling ammonia both in hot spots and at the regional scale

Climate Change 2022 - Impacts, Adaptation and Vulnerability Intergovernmental Panel on Climate Change (IPCC), 2023-06-22 The Working Group II contribution to the Sixth Assessment Report of the Intergovernmental Panel on Climate Change IPCC provides a comprehensive assessment of the scientific literature relevant to climate change impacts adaptation and vulnerability The report recognizes the interactions of climate ecosystems and biodiversity and human societies and integrates across the natural ecological social and economic sciences It emphasizes how efforts in adaptation and in reducing greenhouse gas emissions can come together in a process called climate resilient development which enables a liveable future for biodiversity and humankind The IPCC is the leading body for assessing climate change science IPCC reports are produced in comprehensive objective and transparent ways ensuring they reflect the full range of views in the scientific literature Novel elements include focused topical assessments and an atlas presenting observed climate change impacts and future risks from global to regional scales Available as Open Access on Cambridge Core

Computed Microtomography and 3D Visualization of Fossils Stergios D. Zarkogiannis,Shinya Iwasaki,Elizabeth Clark,Pauline Guenser,2024-02-23 Emerging technologies are opening new avenues for the study of past and present ecosystems Computer aided visualization and analysis of fossil specimens through X ray tomography has revolutionized the study of organisms X ray tomography or X ray computed tomography is a characterization technique for generating 3D information from 2 dimensional X ray image slices X ray imaging is based on the differential absorption or scattering of an X ray source to reveal internal attributes of biological specimens High resolution tomography can retrieve compositional and structural information of small objects or the macrostructure of larger objects non destructively allowing fossils to be characterized in three dimensions and in unprecedented detail This has enabled paleontologists to gain important insights into the anatomy development and preservation of specimens The resulting digital 3D reconstructions can be used in

functional analyses to test hypotheses regarding the paleobiology of extinct organisms that could transform our understanding of long studied fossil groups and the narratives of organismal and ecological evolution Furthermore this proliferation of digital datasets should make the widespread sharing and dissemination of 3D data possible providing access to rare fossil material worldwide

Carbon Cycles and Climate Jerry S. Olson,Linda J. Allison,Bobbie-Neal Collier,1980 This partially annotated bibliography contains the first 1000 references from a computerized file of literature on the global ecological implications of carbon cycles and climatic changes Many early citations originated from the Biogeochemical Ecological Information Center established at Oak Ridge National Laboratory in 1968 and from profiles of computerized files such as Government Research Abstracts GRA and Biological Abstracts BA Later citations have been extracted from the open literature through 1978 and early 1979 from government reports and impact statements and from profiles of GRA BA and the Energy Data Base of the Department of Energy Technical Information Center Oak Ridge Tennessee The subject categories covered by this bibliography may be divided into two main topics carbon cycling and climate system analysis Volume I contains an introduction and overview Volume 2 contains an alphabetical by author listing of citations Volume 3 provides indexes for author organization corporate authority keywords or free index terms taxonomic category subject category Chemical Abstracts codes Biological Abstracts codes crosscode and COSATI Weekly Government Abstracts codes concentrated with permuted title words

Isotope Geochemistry Heinrich D Holland,Karl K. Turekian,2010-09-27 After the discovery that elements were commonly composed of isotopes there developed a range of studies of the variability of isotopic compositions in Earth materials which was able to add to our understanding of Earth processes and history This collection of chapters from the Treatise on Geochemistry describes the range of isotopic studies The chapters are grouped into the following categories light stable isotopes radiogenic tracers noble gases and radioactive tracers The first three groups depend on mass spectrometric measurements The section on radioactive tracers employs both radioactive counting techniques and the newly developed accelerator mass spectrometric techniques Comprehensive interdisciplinary and authoritative content selected by leading subject experts Robust illustrations figures and tables Affordably priced sampling of content from the full Treatise on Geochemistry
