1950s never made it into that era's psychology and language acquisition by children Chomsky in turn invites Moro to describe his own experiments which proved that there exist impossible languages for the brain languages that show surprising properties and reveal unexpected secrets of the human mind Chomsky once said It is important to learn to be surprised by simple facts an expression of yours that has represented a fundamental turning point in my own personal life says Moro and this is something of a theme in their conversation Another theme is that not everything can be known there may be permanent mysteries about language and other matters Not all words will give up their secrets The Publishers' Circular and General Record of British and Foreign Literature ,1867
