

Tessellation 3D Effect Colouring Sheets

Tessellation is created when shapes are put together in a pattern with no gaps or overlapping.

You can create a 3D effect by colouring tessellating shapes in different colours. The tessellating pattern below is created by repeated diamond or rhombus shapes. Three different colours have been chosen to group together three of the shapes to create a 3D cube effect.

In this example below, tessellating triangles have been used with different gradients of the colour. By choosing one colour for a group of three triangles and having a light, medium and darker shade of the same colour a 3D effect with the tessellation has been created.
