

Testable Question and Hypothesis Writing Guided Practice

For each topic below, write a **TESTABLE QUESTION** using the "How does _____ affect _____?" format. Remember to first identify the manipulated (mv) and responding (rv) variables before using the testable question format.

When reviewing the topic... determine the manipulated and the responding variables before developing a testable question. Below are two examples... keep in mind, all of the topics in this practice can be turned into "Testable Questions".

Example 1:

Topic: "Rainy winters"

Possible variables

Manipulated variables: time of year, temperature, or amount of sunlight

Responding variables: rainfall levels (the focus of the topic is rainy winters)

Possible questions: "How does time of year affect rainfall levels?"

"How does temperature affect rainfall levels?"

"How does amount of sunlight affect rainfall levels?"

Example 2:

Topic: "Seahawks"

Possible variables

Manipulated variable: month, rain, temperature

Responding variable: win rate or punt distance

Possible questions: "How does the month affect win rate?"

"How does rain affect quarterback pass percentage affect win rate?"

"How does air temperature affect punt distance?"

For practice write a testable question for each topic. Be very specific and use the format "How does _____ affect _____?" When creating a question you will be narrowing down the topic to "testable variables". Think about what variables you will be testing before writing the question. Yes! This practice is meant to be hard... you will need to apply your critical thinking skills ☺
