[The Joy of Science](#) Richard A. Lockshin, 2007-11-05 Scientists have great passion What could be more exhilarating than to go to work every day feeling as if you were once again a nine year old called up to the stage to help the magician with his trick To be a researcher is to always be in the position of having the chance to see how the trick works No wonder that many researchers feel that each new day is the most exciting day to be a scientist It therefore is not surprising that scientists have such trouble communicating with non-scientists It is difficult for the scientist to understand a life not focused on the desire to understand But the differences are not that Everyone wants to understand that is one of the factors that make us human The difference is more that scientists limit their definition of comprehension to specific rules of logic and evidence These rules apply and are used in everyday life but often with less rigor or restrictions on evidence

Americans treated teaching as a highly personal endeavor dependent on the idiosyncrasies of the instructor the less they could develop shared standards for it Nor have they rigorously documented college instruction a highly public activity which has taken place mostly in private Pushing open the classroom door The Amateur Hour illuminates American college teaching and frames a fresh case for restoring intimate learning communities especially for America s least privileged students Anyone who wants to change college teaching will have to start here

Abramson,2011-12-31

Ethnic Identity in Tang China is the first work in any language to explore comprehensively the construction of ethnicity during the dynasty that reigned over China for roughly three centuries from 618 to 907 Often viewed as one of the most cosmopolitan regimes in China's past the Tang had roots in Inner Asia and its rulers continued to have complex relationships with a population that included Turks Tibetans Japanese Koreans Southeast Asians Persians and Arabs Marc S Abramson's rich portrait of this complex multiethnic empire draws on political writings religious texts and other cultural artifacts as well as comparative examples from other empires and frontiers Abramson argues that various constituencies ranging from Confucian elites to Buddhist monks to barbarian generals sought to define ethnic boundaries for various reasons but often in part out of discomfort with the ambiguity of their own ethnic and cultural identity The Tang court meanwhile alternately sought to absorb some alien populations to preserve the empire's integrity while seeking to preserve the ethnic distinctiveness of other groups whose particular skills it valued Abramson demonstrates how the Tang era marked a key shift in definitions of China and the Chinese people a shift that ultimately laid the foundation for the emergence of the modern Chinese nation *Ethnic Identity in Tang China* sheds new light on one of the most important periods in Chinese history It also offers broader insights on East Asian and Inner Asian history the history of ethnicity and the comparative history of frontiers and empires
