Production-oriented and Comprehension-based Grammar Teaching in the Foreign Language Classroom Anna Mystkowska-Wiertelak,Mirosław Pawlak,2012-03-02 The book addresses one of the key controversies in teaching foreign language grammar which is the utility of production oriented instruction as

exemplified in the PPP sequence and comprehension based teaching as implemented in interpretation tasks and processing instruction. It provides a thorough overview of issues related to learning and teaching grammar with a particular focus on input oriented approaches and reports the findings of four studies which sought to compare their effects with instruction based on different forms of output practice. The findings serve as a basis for guidelines on how the two options can be successfully combined in the classroom.

Applying Cognitive Grammar in the Foreign Language Classroom Jakub Bielak, Mirosław Pawlak, 2013-01-12 The monograph constitutes an attempt to demonstrate how Cognitive Grammar CG can be employed in the foreign language classroom with a view to aiding learners in better understanding the complexities of English grammar. Its theoretical part provides a brief overview of the main tenets of Cognitive Grammar as well as illustrating how the description of English tense and aspect can be approached from a traditional and a CG perspective. The empirical part reports the findings of an empirical study which aimed to compare the effects of instruction utilizing traditional pedagogic descriptions with those grounded in CG on the explicit and implicit knowledge of the Present Simple and Present Continuous Tenses. The book closes with the discussion of directions for further research when it comes to the application of CG to language pedagogy as well as some pedagogic implications.

Talking About Second Language Acquisition Karim Sadeghi, 2022-09-21 This book includes interviews with fourteen internationally acclaimed leading figures in Second Language Acquisition SLA who speak on seminal issues in the field as well as their own contributions to SLA scholarship. As well as covering the contributors' backgrounds and academic achievements, the interviews also delve into their areas of expertise, current theoretical and practical considerations, and contemporary questions, developments, and challenges in SLA. The author probes their views on current topics including input and interaction, vocabulary acquisition, teaching pronunciation, writing development, syntactic processing, multilingualism, L1 attrition, complex dynamic systems, processing instruction, instructed second language acquisition, and technology in language teaching. An introduction by the author draws out the key themes and debates in the field today and highlights areas for future research and further exploration, and a foreword is provided by Rod Ellis. This book will be of interest to students and scholars of Applied Linguistics, Teacher Education, and Methodology, and Second and Foreign Language Education.

Introduction to Instructed Second Language Acquisition Shawn Loewen, 2014-07-21 Introduction to Instructed Second Language Acquisition is the first book to present a cohesive view of the different theoretical and pedagogical perspectives that comprise instructed second language acquisition ISLA, defined as any type of learning that occurs as a result of manipulating the process and conditions of second language acquisition. The book begins by considering the effectiveness of ISLA and the differences between ISLA and naturalistic L2 learning. It then goes on to discuss the theoretical, empirical, and pedagogical aspects of such key issues in ISLA as grammar learning, interaction in the classroom, focus on form, function and meaning, vocabulary learning, pronunciation learning, pragmatics learning, learning contexts, and individual differences. This timely and important

volume is ideally suited for the graduate level ISLA course and provides valuable insights for any SLA scholar interested in the processes involved in second language learning in classroom settings *Twelve Lectures on Second Language Acquisition* Willis Edmondson, 1999 Language, Culture, and the Embodied Mind Joseph Shaules, 2019-12-04 There is an odd contradiction at the heart of language and culture learning Language and culture are so to speak two sides of a single coin language reflects the thinking values and worldview of its speakers Despite this there is a persistent split between language and culture in the classroom Foreign language pedagogy is often conceptualized in terms of gaining knowledge and practicing skills while cultural learning goals are often conceptualized in abstract terms such as awareness or criticality This book helps resolve this dilemma Informed by brain and mind sciences its core message is that language and culture learning can both be seen as a single interrelated process the embodiment of dynamic systems of meaning into the intuitive mind This deep learning process is detailed in the form of the Developmental Model of Linguaculture Learning DMLL Grounded in dynamic skill theory the DMLL describes four developmental levels of language and culture learning which represents a subtle yet important shift in language and culture pedagogy Rather than asking how to add culture into language education we should be seeking ways to make language and culture learning deeper more integrated embodied experiential and transformational This book provides a theoretical approach including practical examples for doing so **Memory, Psychology and Second Language Learning** Mick Randall, 2007-08-23 This book explores the contributions that cognitive linguistics and psychology including neuropsychology have made to the understanding of the way that second languages are processed and learnt It examines areas of phonology word recognition and semantics examining bottom up decoding processes as compared with top down processes as they affect memory It also discusses second language learning from the acquisition learning and nativist connectionist perspectives These ideas are then related to the methods that are used to teach second languages primarily English in formal classroom situations This examination involves both mainstream communicative approaches and more traditional methods widely used to teach EFL throughout the world The book is intended to act both as a textbook for students who are studying second language teaching and as an exploration of issues for the interested teacher who would like to further extend their understanding of the cognitive processes underlying their teaching Mick Randall is currently Senior Lecturer in TESOL and Head of the Institute of Education at the British University in Dubai He has taught courses in second language learning and teaching applied linguistics and psychology in a number of different contexts He has a special interest in the cognitive processing of language and in the psycholinguistics of word recognition spelling and reading *The Language of Mental Illness* Hazel Price, 2022-05-26 Based on a 45 million word corpus this book explores how public perceptions of mental health and illness have changed over time **Second Language Acquisition. Suitability of SLA Theories for the English Language Classroom** Lena Groß, 2015-01-19 Seminar paper from the year 2013 in the subject English Language and Literature Studies Linguistics grade 2.7 Johannes

Gutenberg University Mainz course English Linguistics and the Language Classroom language English abstract Of course there are multiple perspectives in so called Second Language Acquisition SLA which all encompass different hypotheses of how learners acquire a second language Thus in this paper two distinct influential linguistic theories of SLA will be introduced and their main statements will be clarified The first one will be the dominant psychological theory of the 1950s and 1960s named Behaviorist Learning Theory with the focus on habit formation Some years later in the 1960s and 1970s a new mentalist paradigm emerged and in regard to this Krashen s monitor model will be outlined Subsequently these theories will be discussed in relation to their suitability for the English language classroom and probably supplemented Following direct conclusions of how to improve language teaching can be drawn
