*Foundations of College Chemistry* Morris Hein, Susan Arena, Cary Willard, 2023 *Foundations of College Chemistry* 16th edition presents chemistry as a modern vital subject and is designed to make introductory chemistry accessible to all beginning students. It is intended for students who have never taken a chemistry course or those who had a significant interruption in their studies but plan to continue with the general chemistry sequence. The central focus is to make chemistry interesting and understandable and teach students the problem solving skills they will need. This International Adaptation offers new and updated content with improved presentation of all course material. It builds on the strengths of previous editions including clear explanations and step by step problem solving. The material emphasizes real world applications of chemistry as the authors develop the principles that form the foundation for the further study of chemistry. There is new and expanded coverage of polarizing power and polarizability, Fajans rules, collision number and mean free path, abnormal molecular masses and van t Hoff factor and applications of radioactivity.

*Hazards of Nitrogen and Other Inert Gases* M. Darryl Yoes, 2025-05-06 An authoritative discussion of safety considerations for professionals and operators working with or around nitrogen and other inert gases. In *Hazards of Nitrogen and Other Inert Gases: How They Can Be Safely Managed*, experienced refinery supervisor and manager M. Darryl Yoes delivers a thorough discussion of the use of nitrogen and other inert gases in the refining industry and other industries where they are commonly used. The author includes a complete exploration of the hazards of working with and around nitrogen as well as case studies of incidents involving nitrogen in both gas and cryogenic forms and other inert gases including carbon dioxide, argon and neon. Yoes walks readers through the most critical safety aspects of working with asphyxiants such as inert confined space entry and discusses how to avoid and prevent catastrophic incidents. The book offers self quizzes, essential terms, key workflows and checklists for routine practice. Readers will also find a thorough background on nitrogen use and the hazards that flow from working with it. Comprehensive explorations of incidents involving asphyxiation, hypoxia and cold burns resulting from nitrogen gas and liquid form and other inert gases. Practical discussions of the prevention of catastrophic incidents involving inert gases. Additional discussions of other inert gases including carbon dioxide and helium. Perfect for all operations personnel who work with or around asphyxiants including petroleum refining and petrochemical plant operators, line supervisors and process and mechanical engineers, this book will also benefit new operators and advanced students learning about or working with nitrogen and other inert gases.
