$$3x + 9 > 18$$

## Common Core Standards

### Grade 8

- 8.EE.1.5** Understand solving an equation or inequality as a process of reasoning: a sequence of steps leads from a specified set of conditions to a solution; check the solution by substituting it into the original equation or inequality. Use substitution to determine whether a given number is a solution to an equation or inequality.
- 8.EE.1.6** Use variables to represent numbers and write expressions when solving a real-world or mathematical problem; understand that a variable can represent an unknown number, or, depending on the purpose at hand, any number in a specified set.
- 8.EE.1.8** Write an inequality of the form  $x > c$  or  $x < c$  to represent a condition or constraint in a real-world or mathematical problem. Recognize that inequalities of the form  $x > c$  or  $x < c$  have infinitely many solutions; represent solutions of such inequalities on number line diagrams.

### Grade 7

- 7.EE.1.4** Use variables to represent quantities in a real-world or mathematical problem, and construct simple equations and inequalities to solve problems by reasoning about the quantities.

### High School – Algebra

- A-REI.1.3** Solve linear equations and inequalities in one variable, including equations with coefficients represented by letters.
