Exploring Creativity Through Writing Alan Maley, Sharoon Sunny, 2025-08-01 The book explores the nature of human creativity and its importance in education with reference to past and ongoing work on creativity theory. It aims to direct the attention of teachers to the need for creativity in education by dispelling the mystique surrounding it and the feelings of inadequacy or apprehension it may evoke in educators particularly in the Asia region. The book offers an introduction to creativity in writing the rationale for including it in language programmes the benefits it can bestow and the results it can produce as well as dealing with common objections to it. It divides creative writing into two major sections poetry and stories followed by a copious set of varied classroom activities. For each activity a standard format is adopted to offer teachers maximum support in implementing the procedures including supplementary comments on each activity. It is distinct for its accessibility and clarity its abundance of practical and ready to use classroom activities and its unique combination of theoretical underpinnings and practical implementation. This book will be useful to students pre service teachers and researchers who are new to the teaching of English Language both in the Asian context and in the wider world. It will also be an essential companion to practicing in service teachers and Teacher Trainers to further sharpen their concepts and skills.

Multiple Voices in the Translation Classroom Maria González Davies, 2004-07-15 The main aim of this book is to provide teaching ideas that can be adapted to different learning environments and that can be used with different language combinations. The pedagogical approach and the activities tasks and projects are based on Communicative Humanistic and Socioconstructivist principles the students are actively involved in their learning process by making decisions and interacting with each other in a classroom setting that is a discussion forum and hands on workshop. Clear aims are specified for the activities which move from the most rudimentary level of the word to the more complicated issues of syntax and finally to those of cultural difference. Moreover they attempt to synthesize various translation theories not only those based on linguistics but those derived from cultural studies as well. This volume will be of interest to translation teachers to foreign language teachers who wish to include translation in their classes to graduates and professional translators interested in becoming teachers and also to administrators exploring the possibility of starting a new translation programme.
