and comprehensive knowledge of the social sciences Chemiluminescence and Bioluminescence Aldo Roda, 2011 This comprehensive overview of chemiluminescence and bioluminescence covers historical developments fundamental principles recent advances instrumentation and applications Cumulated Index Medicus ,1984 *An Introduction to EU Competition Law* Moritz Lorenz, 2013-04-25 Succinct and concise covering all key substantive and procedural aspects of the subject this textbook is required reading for students of EU competition law The author's clarity of expression and wealth of worked examples makes this sometimes complex subject accessible This refreshing uncluttered approach guarantees the students understanding and engagement **Selectivity in State Aid Law and the Methods for the Allocation of the Corporate Tax Base** Jérôme Monsenego, 2018-06-05 High profile cases before the European Commission and the EU courts have intensified scrutiny of the link between State aid law and the taxation of multinational enterprises Certain decisions have raised questions about fiscal sovereignty and the interpretation of the rules on State aid in particular the notion of selectivity which have not been addressed in detail by existing research The combination of the evolution of the notion of selectivity in State aid law on the one hand and the need to adapt the rules for the taxation of the profits of multinational enterprises to the modern economy on the other hand makes it necessary to assess whether existing as well as alternative rules for the allocation of the corporate tax base might entail a selective treatment This book responds to the need of research in the area of State aid law applied to the taxation of the income of multinational enterprises focusing on the crucial concept of selectivity The analysis proceeds with a detailed investigation of the theoretical issues that arise when applying the selectivity test in State aid law to three methods for the allocation of the corporate tax base between the members of multinational enterprises the arm's length principle transfer pricing safe harbours and systems of formula apportionment This research project is conducted at a theoretical level without considering national provisions or particular tax treaties The author suggests an analytical framework on the application of the selectivity test to the three allocation methods It is concluded that these methods are likely to have certain selective features with varying possibilities to be justified by the inner logic of a corporate income tax system It is also demonstrated that selectivity occurs for different reasons due to the different rationales of the three allocation methods This book is intended at contributing to the academic literature on the impact of State aid law on the principles for the taxation of the income of multinational enterprises The outcome of this research project is also relevant for lawmakers who need to reconcile the imperatives of State aid law with the design of rules that match their tax policies as well as for judges or lawyers who apply the rules on State aid to tax provisions

Electro-technology Stanley A. Dennis, Leon Irving Thomas, 1961 *The Politics of Humanitarian Technology* Katja Lindskov Jacobsen, 2015-06-05 This book offers a detailed exploration of three examples of humanitarian uses of new technology employing key theoretical insights from Foucault We are currently seeing a humanitarian turn to new digital technologies such as biometrics remote sensing and surveillance drones However such humanitarian uses of new

technology have not always produced beneficial results for those at the receiving end and have sometimes exposed the subjects of assistance to additional risks and insecurities Engaging with key insights from the work of Foucault combined with selected concepts from the Science and Technology Studies literature this book produces an analytical framework that opens up the analysis to details of power and control at the level of materiality that are often ignored in liberal histories of war and modernity Whereas Foucault details the design of prisons factories schools etc this book is original in its use of his work in that it uses these key insights about the details of power embedded in material design but shifts the attention to the technologies and attending forms of power that have been experimented with in the three humanitarian endeavours presented in the book In doing so the book provides new information about aspects of liberal humanitarianism that contemporary critical analyses have largely neglected This book will be of interest to students of humanitarian studies peace and conflict studies critical security studies and IR in general
