Resources in Education, 1994. **You too can become an I.P.S. Officer**, **Psychology and the Developing World** Stuart C. Carr, John F. Schumaker, 1996-04-18. Previous leading commentators on the development of psychology in the Third World have conceived of three major stages: an attempt to assimilate Western psychology with predictably negative results, the study of indigenous constructs with more relevant applications, and finally transcending stage one and stage two to choose theories and methods on their applied merit alone. Psychology and the Developing World has been assembled to document how close psychology has come to researching that stage. Contributors were carefully selected to provide a unique overview of the latest applications of the discipline as a whole. Their work reveals how psychology is being applied to educational needs, management needs and health needs. This book shows how development studies and allied disciplines cannot ignore psychology's potential for the Third World.
