Descriptive Adaptation Studies Patrick Cattrysse ,2014-02-18 It is common practice nowadays for adaptation critics to denounce the lack of meta theoretical thinking in adaptation studies and to plead for a study of adaptation as adaptation one that eschews value judgments steps beyond normative fidelity based discourse examines adaptation from an intertextual perspective and abandons the single source model for a multiple source model This study looks into a research program that does all that and more It was developed in the late 1980s and presented in the early 1990s as a polysystem PS study of adaptations Since then the PS label has been replaced with descriptive This book studies the question of whether and how a PS approach could evolve into a descriptive adaptation studies DAS approach Although not perfect no method is DAS offers a number of assets Apart from dealing with the above mentioned issues DAS transcends an Auteurist approach and looks at explanation beyond the level of individual agency even if contextualized As an alternative to the endless accumulation of ad hoc case studies it suggests corpus based research into wider trends of adaptational behavior and the roles and functions of sets of adaptations DAS also allows reflection upon its own epistemic values It sheds new light on some old issues How can one define adaptation What does it mean to study adaptation as adaptation Is equivalence still possible and is the concept still relevant DAS also tackles some deeper epistemological issues How can phenomena be compared Why would difference be more real than sameness or change more real than stasis How does description relate to evaluation explanation and prediction etc This book addresses both theory minded scholars who are interested in epistemological reflection and practice oriented adaptation students who want to get started From a theoretical point of view it discusses arguments that could support the legitimacy of adaptation studies as an academic discipline From a practical point of view it explains in general terms ways of conducting an adaptation study Patrick Cattrysse s work is of utmost importance to Adaptation Studies As the first extended attempt to develop a rigorous methodology which borrows in very meaningful ways from Adaptation Studies cousin Translation Studies this book should be on every Adaptation scholar s shelf While Hutcheons Sanders and Leitch to name but a few layed the groundwork which allowed Adaptation Studies to establish itself as a field of inquiry in its own right Cattrysse moves the field into the next necessary stage that of developing conceptual tools which stand the test of critical investigation and allow Adaptation Studies to move beyond the single case study approach Katja

Krebs University of Bristol This book is a bold initiative it proposes and illustrates a comprehensive new empirical research programme for film adaptation studies inspired by the way systems theory and norm theory have expanded Translation Studies One of the book's unusual strengths is the way the proposal is grounded in a thoughtful theoretical discussion of conceptual and methodological issues dealing with such notions as theory descriptivism definition diachrony and explanation This gives the work a significance that ranges well beyond Adaptation Studies alone it deserves the attention of scholars in the humanities in general Andrew Chesterman University of Helsinki This dense and theoretically informed study argues forcefully for a descriptive systems analysis approach to literature film adaptation building on the author's earlier corpus based study of film noir and adaptation Providing a wide ranging discussion of important critical questions including the place of logical positivism in humanistic studies this book will give adaptation scholars much to think about Well written carefully organized and consistently persuasive DESCRIPTIVE ADAPTATION STUDIES promises to be an important intervention in a field of increasing importance in humanistic studies Must reading for scholars in the field R Barton Palmer Clemson University

Computers Helping People with Special Needs Klaus Miesenberger, Joachim Klaus, Wolfgang Zagler, 2003-08-02 Success and efficiency are the latest standards and scales of our society Virtual surroundings and communication rooms electronic portals and platforms are pushing us into a new world of personal and professional interaction and cooperation The network to subdue violence is fragile and crumbly tradition is no longer a power of our community What of leisure time dreams and fantasy What of education in the family at school and at university Travelling round the world to develop yourself how man becomes man pleading for a new determination of the idea of education a mission of past centuries inadequate nowadays Regarding September 11th last year the conflicts and confrontations round the globe and events in our direct surroundings these questions seem to be a cry at least to reflect upon what is happening around us and where we all of us still play an active role An International Conference on Computers Helping People with Special Needs is like an island is this a topic at all these days is it worth discussing the area of ICT and the situation of people with disabilities persons who are segregated from developing their personal and professional careers Indeed the biennial meeting has never included these actualities but the basic idea behind ICCHP starting in 1989 was to focus on these fringe groups and to offer a platform of exchange on all aspects of Human Computer Interaction and the usage of ICT for people with special needs

Inclusion Practices with Special Needs Students Steven I Pfeiffer, Linda A Reddy, 2014-01-02 Explore the challenges opportunities and pitfalls of the inclusion of students with disabilities in your classroom Exciting complex and challenging shifts in American education are occurring today First

schools are moving to embrace student diversity and accommodate the classroom experience to support diverse ways of organizing students for learning. Second, teachers are moving away from a traditional didactic instructional mode and embracing a facilitator role that encourages creating innovative classroom learning opportunities. Third, there is a shift from the view of the school as providing educational and psychoeducational services for students to providing educational supports for learning. Coinciding with these changes is the growing movement in special education that encourages full inclusion of students with special needs. This is a far cry from the exclusionary and separatist movements of special education less than twenty years ago. Now American education is facing the challenging situation of working with students with disabilities in the regular classroom. *Inclusion Practices with Special Needs Students* provides a much needed overview of the issues faced by educators committed to understanding how to best serve children with disabilities in schools. *Inclusion Practices with Special Needs Students: Theory, Research, and Application* provides an overview of the origins, evolution, and recent developments regarding the inclusion of students with disabilities into general education classrooms. The book critically challenges the overriding assumptions that support the philosophy of inclusion with a balanced presentation of research and theory that both supports and raises questions about the viability of this practice. The contributors are authorities in their respective areas of inclusionary practices. Some of the issues you will explore in *Inclusion Practices with Special Needs Students* are political, fiscal, and legal events that have shaped inclusion practices, implications for school psychologists handling students with serious emotional, behavioral, or developmental problems, remaining in regular education, agenda for future research, priorities for research, training, and policy reform. *Inclusion Practices with Special Needs Students* addresses practical, psychoeducational, philosophical, legal, ethical, and financial issues surrounding the inclusionary initiative in special education.
