 to Standard Floras of the World* David G. Frodin,2001-06-14 This 2001 book provides a selective annotated bibliography of
 the principal floras and related works of inventory for vascular plants The second edition was completely updated and
 expanded to take into account the substantial literature of the late twentieth century and features a more fully developed
 review of the history of floristic documentation The works covered are principally specialist publications such as floras
 checklists distribution atlases systematic iconographies and enumerations or catalogues although a relatively few more
 popularly oriented books are also included The Guide is organised in ten geographical divisions with these successively
 divided into regions and units each of which is prefaced with a historical review of floristic studies In addition to the
 bibliography the book includes general chapters on botanical bibliography the history of floras and general principles and
 current trends plus an appendix on bibliographic searching a lexicon of serial abbreviations and author and geographical
 indexes *Educators Guide to Free Social Studies Materials* Patricia A. Horkheimer Suttles,1965 **Natural Resources
 as Capital** Larry Karp,2017-10-27 An introduction to the concepts and tools of natural resource economics including
 dynamic models market failures and institutional remedies This introduction to natural resource economics treats resources
 as a type of capital their management is an investment problem requiring forward looking behavior within a dynamic setting
 Market failures are widespread often associated with incomplete or nonexistent property rights complicated by policy
 failures The book covers standard resource economics topics including both the Hotelling model for nonrenewable resources

and models for renewable resources The book also includes some topics in environmental economics that overlap with natural resource economics including climate change The text emphasizes skills and intuition needed to think about dynamic models and institutional remedies in the presence of both market and policy failures It presents the nuts and bolts of resource economics as applied to nonrenewable resources including the two period model stock dependent costs and resource scarcity The chapters on renewable resources cover such topics as property rights as an alternative to regulation the growth function steady states and maximum sustainable yield using fisheries as a concrete setting Other less standard topics covered include microeconomic issues such as arbitrage and the use of discounting policy problems including the Green Paradox foundations for policy analysis when market failures are important and taxation Appendixes offer reviews of the relevant mathematics The book is suitable for use by upper level undergraduates or with the appendixes masters level courses
