Topic	Student Checklist	R	A	G
6.5.1 Forces and their interactions	Identify and describe scalar quantities and vector quantities			
	Identify and give examples of forces as contact or non-contact forces			
	Describe the interaction between two objects and the force produced on each as a vector			
	Describe weight and explain that its magnitude at a point depends on the gravitational field strength			
	Calculate weight by recalling and using the equation: [ $W = mg$ ]			
	Represent the weight of an object as acting at a single point which is referred to as the object's 'centre of mass'			
	Calculate the resultant of two forces that act in a straight line			
	HT ONLY: describe examples of the forces acting on an isolated object or system			
	HT ONLY: Use free body diagrams to qualitatively describe examples where several forces act on an object and explain how that leads to a single resultant force or no force			
	HT ONLY: Use free body diagrams and accurate vector diagrams to scale, to resolve multiple forces and show magnitude and direction of the resultant			
6.5.2 Work done and energy	HT ONLY: Use vector diagrams to illustrate resolution of forces, equilibrium situations and determine the resultant of two forces, to include both magnitude and direction			
	Describe energy transfers involved when work is done and calculate the work done by recalling and using the equation: [ $W = Fs$ ]			
	Describe what a joule is and state what the joule is derived from			
	Convert between newton-metres and joules.			
6.5.3 Forces and elasticity	Explain why work done against the frictional forces acting on an object causes a rise in the temperature of the object			
	Describe examples of the forces involved in stretching, bending or compressing an object			
	Explain why, to change the shape of an object (by stretching, bending or compressing), more than one force has to be applied – this is limited to stationary objects only			
	Describe the difference between elastic deformation and inelastic deformation caused by stretching forces			
	Describe the extension of an elastic object below the limit of proportionality and calculate it by recalling and applying the equation: [ $F = ke$ ]			
	Explain why a change in the shape of an object only happens when more than one force is applied			
	Describe and interpret data from an investigation to explain possible causes of a linear and non-linear relationship between force and extension			
	Calculate work done in stretching (or compressing) a spring (up to the limit of proportionality) by applying, but not recalling, the equation: [ $E_e = \frac{1}{2}ke^2$ ]

**Psychology a Level Year 2. Two a Star Exams. Paper 1 and Paper 2 (First Set)** Joseph Anthony Campbell, 2020-11-24

This book will provide you with crystal clear and accurate full mark examples of an A star grade AQA A Level Year 2 Psychology Paper 1 and Paper 2 examination from the current syllabus that I have created with my Quality Control System<sup>tm</sup> and moderated. This enables students to achieve the same grade in their upcoming examinations. The Quality Control System<sup>tm</sup> includes a summary of the Examination Papers, how to approach the Assessment Objectives in each examination and the correct Timings, minutes per mark and Word Count per mark for each question. This will ensure success in your Psychology examinations as it has done for my students. I teach both GCSEs and A levels and I am a qualified and experienced teacher and tutor of over 18 years standing. I teach, write and provide independent tuition in central and west London. I graduated from the Universities of Liverpool and Leeds and I obtained first class honours in my teacher training. I also write academic resources for the Times Educational Supplement. One of the most common questions my students have is: How do I get an A star in my exam? I have sought out model answers over the years which concentrate on how much time you should spend on each question, how the Assessment Objectives are met and how many words need to be produced for each question. Failing to find this or even a concise layout of what is in each paper for AQA Psychology, I set about creating the answer to this real need. This book is the answer to this question and answers a real need that remains sadly unmet for the vast majority of students as you need to see it to be it. In this case, an A Star student. With coursework a thing of the past, your exams have never been more important, with your entire grade decided by your exams and therefore your future place at university, which is the springboard to your future. Sadly, in addition to this, there has been so much disturbance and missed teaching time over the last couple of years too, but this book will give you a head start. As a tutor, I have often had extreme time pressures to give students the best chance in their exams with very limited teaching time available. This collection of exam answers is the best answer to these unavoidable problems. This book is packed with in-depth exemplar answers that demonstrate what A star exam answers look like on the full Psychology course. With a distinct focus on AQA's Assessment Objectives and the AQA Mark Scheme criteria, these answers clarify the exam requirements and demonstrate how to construct full mark answers. The exam answers in this book push you towards your highest level and help you to remember what you have learnt in a practical and effective way, thus demonstrating how to get every mark from the examiners. Through clear examples which demystify how to write the perfect answers, you can achieve A's and A Stars in the 2022 and 2023 Psychology A level examinations as perfect exam practice makes for perfect AQA Psychology exams. My tuition students have been fortunate enough to attain places to study at Oxford, Cambridge and Imperial College London and other Russell Group Universities. The students have done very well in their examinations and one Psychology student even obtained full UMS marks in their Psychology examinations. I hope and know that my Psychology books can enable you to take the next step on your academic journey. The resources and information in this book WILL help you get an A or A star in your AQA A Level Year
