From Indra's Net to Internet Daniel Veidlinger,2018-08-31 In this sweeping and ambitious intellectual history Daniel Veidlinger traces the affinity between Buddhist ideas and communications media back to the efflorescence of Buddhism in the Axial Age of the mid first millennium BCE He uses both communications theory and the idea of convergent evolution to show how Buddhism arose in the largely urban milieu of Axial Age northeastern India and spread rapidly along the transportation and trading nodes of the Silk Road where it appealed to merchants and traders from a variety of backgrounds Throughout he compares early phases of Buddhism with contemporary developments in which rapid changes in patterns of social interaction were also experienced and brought about by large scale urbanization and growth in communication and transportation In both cases such changes supported the expansive consciousness needed to allow Buddhism to germinate Veidlinger argues that Buddhist ideas tend to fare well in certain media environments through a careful analysis of communications used in these contexts he finds persuasive parallels with modern advances in communications technology that amplify the conditions and effects found along ancient trade routes From Indra s Net to Internet incorporates historical research as well as data collected using computer based analysis of user generated web content to demonstrate that robust communication networks which allow for relatively easy contact among a variety of people support a de centered understanding of the self greater compassion for others an appreciation of interdependence a universal outlook and a reduction in emphasis on the efficacy of ritual all of which lie at the heart of the Buddha s teachings The book s interdisciplinary approach should appeal to those interested in not only Buddhism media studies and history but also computer science cognitive science and cultural evolution
