**A Biography of the Pixel** Alvy Ray Smith, 2021-08-03 The pixel as the organizing principle of all pictures from cave paintings to Toy Story The Great Digital Convergence of all media types into one universal digital medium occurred with little fanfare at the recent turn of the millennium The bit became the universal medium and the pixel a particular packaging of bits conquered the world Henceforward nearly every picture in the world would be composed of pixels cell phone pictures app interfaces Mars Rover transmissions book illustrations videogames In A Biography of the Pixel Pixar cofounder Alvy Ray Smith argues that the pixel is the organizing principle of most modern media and he presents a few simple but profound ideas that unify the dazzling varieties of digital image making Smith s story of the pixel s development begins with Fourier waves proceeds through Turing machines and ends with the first digital movies from Pixar DreamWorks and Blue Sky Today almost all the pictures we encounter are digital mediated by the pixel and irretrievably separated from their media museums and kindergartens are two of the last outposts of the analog Smith explains engagingly and accessibly how pictures composed of invisible stuff become visible that is how digital pixels convert to analog display elements Taking the special case of digital movies to represent all of Digital Light his term for pictures constructed of pixels and drawing on his decades of work in the field Smith approaches his subject from multiple angles art technology entertainment business and history A Biography of the Pixel is essential reading for anyone who has watched a video on a cell phone played a videogame or seen a movie 400 pages of annotations prepared by the author and available online provide an invaluable resource for readers

**ICPMG2014 - Physical Modelling in Geotechnics** Christophe Gaudin, David White, 2019-01-08 The 8th International Conference on Physical Modelling in Geotechnics ICPMG2014 was organised by the Centre for Offshore Foundation Systems at the University of Western Australia under the auspices of the Technical Committee 104 for Physical Modelling in Geotechnics of the International Society of Soil Mechanics and Geotechnical Engineering This quadrennial conference is the traditional focal point for the physical modelling community of academics scientists and engineers to present and exchange the latest developments on a wide range of physical modelling aspects associated with geotechnical engineering These proceedings together with the seven previous proceedings dating from 1988 present an inestimable collection of the technical and scientific developments and breakthroughs established over the last 25 years These proceedings include 10 keynote lectures from scientific leaders within the physical modelling community and 160 peer reviewed papers from 26 countries They are organised in 14 themes presenting the latest developments in physical modelling technology modelling techniques and sensors through a wide range of soil structure interaction problems including shallow and deep foundations offshore geotechnics dams and embankments excavations and retaining structures and slope stability Fundamental aspects of earthquake engineering geohazards ground reinforcements and improvements and soil properties and behaviour are also covered demonstrating the increasing complexity of modelling arising from state of the art technological developments and

increased understanding of similitude principles A special theme on education presents the latest developments in the use of physical modelling techniques for instructing undergraduate and postgraduate students in geotechnical engineering **New Frontiers in Teaching and Learning English** Paola Vettorel, 2015-06-18 The contributions to this volume explore several focal issues related to the global spread of English and their implications for English language teaching providing both theoretical and empirical perspectives on recent research and implications in educational terms The volume is divided into three thematic sections namely Developments in ELF research and pedagogic implications Raising teachers awareness of ELF and ELF and ELT practices The book provides up to date perspectives on the issues implications and repercussions that findings in ELF research can have for ELT practices The contributors are all scholars and researchers who have long been engaged in ELF related research and who have undertaken operational and practical work in the field and as such offer novel perspectives on the effects of EFL research on the teaching and learning of English The volume also presents the findings of innovative projects in teacher education involving pre and in service teachers providing exemplificative good practices of possible new routes into pluralistic ELF aware and ELF oriented didactic perspectives **Drawing Futures** Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture Despite numerous developments in technological manufacture and computational design that provide new grounds for designers the act of drawing still plays a central role as a vehicle for speculation There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation Drawing Futures will present a compendium of projects writings and interviews that critically reassess the act of drawing and where its future may lie Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016 Bringing together practitioners from many creative fields the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas **The Routledge Companion to Entrepreneurship** Ted Baker, Friederike Welter, 2014-09-15 Research in entrepreneurship has been booming with perspectives from a range of disciplines and numerous developing schools of thought It can be difficult for young scholars and even long time researchers to find their way through the lush garden of ideas we see before us The purpose of this book is to map the research terrain of entrepreneurship providing the perfect starting point for new and existing researchers looking to explore Topics covered range from emerging perspective through issues at the core of the field to innovative methodologies Starting off with a preface by Bill Gartner each section of the book brings together a world

class set of established leading researchers and rising stars This considered comprehensive and conclusive companion integrates the recent debates in entrepreneurship research under one cover to provide a resource which will be useful across disciplinary boundaries and for a whole range of students and researchers      *Artificial Neural Networks in Pattern Recognition* Luca Pancioni,Friedhelm Schwenker,Edmondo Trentin,2018-08-29 This book constitutes the refereed proceedings of the 8th IAPR TC3 International Workshop on Artificial Neural Networks in Pattern Recognition ANNPR 2018 held in Siena Italy in September 2018 The 29 revised full papers presented together with 2 invited papers were carefully reviewed and selected from 35 submissions The papers present and discuss the latest research in all areas of neural network and machine learning based pattern recognition They are organized in two sections learning algorithms and architectures and applications Chapter Bounded Rational Decision Making with Adaptive Neural Network Priors is available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](http://springer.com)      *Handbook of Religion and Society* David Yamane,2016-07-15 The Handbook of Religion and Society is the most comprehensive and up to date treatment of a vital force in the world today It is an indispensable resource for scholars students policy makers and other professionals seeking to understand the role of religion in society This includes both the social forces that shape religion and the social consequences of religion This handbook captures the breadth and depth of contemporary work in the field and shows readers important future directions for scholarship Among the emerging topics covered in the handbook are biological functioning organizational innovation digital religion spirituality atheism and transnationalism The relationship of religion to other significant social institutions like work and entrepreneurship science and sport is also analyzed Specific attention is paid where appropriate to international issues as well as to race class sexuality and gender differences This handbook includes 27 chapters by a distinguished diverse and international collection of experts organized into 6 major sections religion and social institutions religious organization family life course and individual change difference and inequality political and legal processes and globalization and transnationalism      **The Role of Volatiles in the Genesis, Evolution and Eruption of Arc Magmas** G.F. Zellmer,M. Edmonds ,S.M. Straub ,2015-03-17 The subduction zone volatile cycle is key to understanding the petrogenesis transport storage and eruption of arc magmas Volatiles control the flux of slab components into the mantle wedge are responsible for melt generation through lowering the solidi of mantle materials and influence the crystallizing phase assemblages in the overriding crust Further the rates and extents of degassing during magma storage and decompression affect magma rheology ultimately control eruption style and have consequences for the environmental impact of explosive arc volcanism This book highlights recent progress in constraining the role of volatiles in magmatic processes Individual book sections are devoted to tracing volatiles from the subducting slab to the overriding crust their role in subvolcanic processes and eruption triggering as well as magmatic hydrothermal systems and volcanic degassing For the first time all aspects of the overarching theme of volatile cycling are covered in detail within a single volume      **Intrinsic**

**motivations and open-ended development in animals, humans, and robots** Gianluca Baldassarre, Tom Stafford, Marco Mirolli, Peter Redgrave, Richard Michael Ryan, Andrew Barto, 2015-02-10 The aim of this Research Topic for Frontiers in Psychology under the section of Cognitive Science and Frontiers in Neurorobotics is to present state of the art research whether theoretical empirical or computational investigations on open ended development driven by intrinsic motivations The topic will address questions such as How do motivations drive learning How are complex skills built up from a foundation of simpler competencies What are the neural and computational bases for intrinsically motivated learning What is the contribution of intrinsic motivations to wider cognition Autonomous development and lifelong open ended learning are hallmarks of intelligence Higher mammals and especially humans engage in activities that do not appear to directly serve the goals of survival reproduction or material advantage Rather a large part of their activity is intrinsically motivated behavior driven by curiosity play interest in novel stimuli and surprising events autonomous goal setting and the pleasure of acquiring new competencies This allows the cumulative acquisition of knowledge and skills that can later be used to accomplish fitness enhancing goals Intrinsic motivations continue during adulthood and in humans artistic creativity scientific discovery and subjective well being owe much to them The study of intrinsically motivated behavior has a long history in psychological and ethological research which is now being reinvigorated by perspectives from neuroscience artificial intelligence and computer science For example recent neuroscientific research is discovering how neuromodulators like dopamine and noradrenaline relate not only to extrinsic rewards but also to novel and surprising events how brain areas such as the superior colliculus and the hippocampus are involved in the perception and processing of events novel stimuli and novel associations of stimuli and how violations of predictions and expectations influence learning and motivation Computational approaches are characterizing the space of possible reinforcement learning algorithms and their augmentation by intrinsic reinforcements of different kinds Research in robotics and machine learning is yielding systems with increasing autonomy and capacity for self improvement artificial systems with motivations that are similar to those of real organisms and support prolonged autonomous learning Computational research on intrinsic motivation is being complemented by and closely interacting with research that aims to build hierarchical architectures capable of acquiring storing and exploiting the knowledge and skills acquired through intrinsically motivated learning Now is an important moment in the study of intrinsically motivated open ended development requiring contributions and integration across a large number of fields within the cognitive sciences This Research Topic aims to contribute to this effort by welcoming papers carried out with ethological psychological neuroscientific and computational approaches as well as research that cuts across disciplines and approaches [Medical Image Computing and Computer Assisted Intervention - MICCAI 2019](#) Dinggang Shen, Tianming Liu, Terry M. Peters, Lawrence H. Staib, Caroline Essert, Sean Zhou, Pew-Thian Yap, Ali Khan, 2019-10-10 The six volume set LNCS 11764 11765 11766 11767 11768 and 11769 constitutes the refereed proceedings of the 22nd International Conference on Medical

Image Computing and Computer Assisted Intervention MICCAI 2019 held in Shenzhen China in October 2019 The 539 revised full papers presented were carefully reviewed and selected from 1730 submissions in a double blind review process The papers are organized in the following topical sections Part I optical imaging endoscopy microscopy Part II image segmentation image registration cardiovascular imaging growth development atrophy and progression Part III neuroimage reconstruction and synthesis neuroimage segmentation diffusion weighted magnetic resonance imaging functional neuroimaging fMRI miscellaneous neuroimaging Part IV shape prediction detection and localization machine learning computer aided diagnosis image reconstruction and synthesis Part V computer assisted interventions MIC meets CAI Part VI computed tomography X ray imaging

**Flexible Glass** Sean M. Garner, 2017-08-10 Provides the reader how to apply flexible glass applications that are not possible or practical to address with alternative substrate materials Examples of technology areas include displays touch sensors lighting backplanes and photovoltaics Built on more than 10 years of valuable discussions and collaborations focused on truly defining what flexible glass means in the context of the emerging electronic and opto electronic applications this book provides a broad overview as well as detailed descriptions that cover flexible glass properties device fabrication methods and emerging applications It provides the basis for identifying new device designs applications and manufacturing processes for which flexible glass substrates are uniquely suited and encourages and enables the reader to identify and pursue advanced flexible glass applications that do not exist today and provides a launching point for exciting future directions The chapters are grouped into three sections The first focuses on flexible glass and flexible glass reliability and has three chapters with authors from Corning The second section focuses on flexible glass device fabrication which includes chapters on roll to roll processing vacuum deposition and printed electronics These chapters are authored by established experts in their respective fields that have extensive experience in processing flexible glass substrates in toolsets that range from research to pilot scale The third section focuses on flexible glass device applications and includes chapters on photovoltaics displays integrated photonics and microelectronics integration These are authored by experts with direct experience in fabricating and characterizing flexible glass devices The diverse list of authors and their depth of experience in working with a variety of material systems processes and device technologies significantly adds valuable context to the overall flexible glass discussion

Proceedings of the International Conference on Intelligent Systems and Signal Processing Rahul Kher, Dr. Nikhil Gondaliya, Mukesh Bhesaniya, Latif Ladid, Mohammed Atiquzzaman, 2018-01-18 The book provides insights into International Conference on Intelligent Systems and Signal Processing ISSP 2017 held at G H Patel College of Engineering Technology Gujarat India during March 24 25 2017 The book comprises contributions by the research scholars and academicians covering the topics in signal processing and communication engineering applied electronics and emerging technologies computer vision and machine learning big data and cloud computing and advanced intelligent power electronics and drives systems The main emphasis of the book is on

dissemination of information experience and research results on the current topics of interest through in depth discussions and contribution of researchers from all over world The book is useful for research community academicians industrialists and post graduate students across the globe      Neuromorphic Engineering Systems and Applications André van Schaik,Tobi Delbruck,Jennifer Hasler,2015-07-05 Neuromorphic engineering has just reached its 25th year as a discipline In the first two decades neuromorphic engineers focused on building models of sensors such as silicon cochleas and retinas and building blocks such as silicon neurons and synapses These designs have honed our skills in implementing sensors and neural networks in VLSI using analog and mixed mode circuits Over the last decade the address event representation has been used to interface devices and computers from different designers and even different groups This facility has been essential for our ability to combine sensors neural networks and actuators into neuromorphic systems More recently several big projects have emerged to build very large scale neuromorphic systems The Telluride Neuromorphic Engineering Workshop since 1994 and the CapoCaccia Cognitive Neuromorphic Engineering Workshop since 2009 have been instrumental not only in creating a strongly connected research community but also in introducing different groups to each other s hardware Many neuromorphic systems are first created at one of these workshops With this special research topic we showcase the state of the art in neuromorphic systems      **Information Security Applications** Brent ByungHoon Kang,JinSoo Jang,2019-04-11 This book constitutes the thoroughly refereed post conference proceedings of the 19th International Conference on Information Security Applications WISA 2018 held on Jeju Island Korea in August 2018 The 11 revised full papers and 11 short papers presented in this volume were carefully reviewed and selected from 44 submissions The primary focus of WISA 2018 was on systems and network security including all other technical and practical aspects of security applications and also on the embedded unmanned or autonomous systems and cyber physical systems in general      *2024-25 SSC JE Mechanical Engineering Solved Papers* YCT Expert Team , 2024 25 SSC JE Mechanical Engineering Solved Papers 768 1495 E This book contains 55 sets of previous solved papers      Liquid Crystals and Display Technology Morteza Sasani Ghamsari,Irina Carlescu,2020-10-07 Liquid crystals have attracted scientific attention for potential applications in advanced devices Display technology is continuously growing and expanding and as such this book provides an overview of the most recent advances in liquid crystals and displays Chapters cover such topics as nematic liquid crystals active matrix organic light emitting diodes and tetradentate platinum II emitters among others      *Selected Papers from the 15th Estuarine and Coastal Modeling Conference* Richard P. Signell,2019-07-30 This book is a printed edition of the Special Issue Selected Papers from the 15th Estuarine and Coastal Modeling Conference that was published in JMSE      **Reasoning in Measurement** Nicola Mößner,Alfred Nordmann,2017-03-16 This collection offers a new understanding of the epistemology of measurement The interdisciplinary volume explores how measurements are produced for example in astronomy and seismology in studies of human sexuality and ecology in brain imaging and intelligence testing It considers photography as a

measurement technology and Henry David Thoreau's poetic measures as closing the gap between mind and world. By focusing on measurements as the hard won results of conceptual as well as technical operations the authors of the book no longer presuppose that measurement is always and exclusively a means of representing some feature of a target object or entity. Measurement also provides knowledge about the degree to which things have been standardized or harmonized; it is an indicator of how closely human practices are attuned to each other and the world.      *Computational Intelligence in Communications and Business Analytics* Somnath Mukhopadhyay, Sunita Sarkar, Paramartha Dutta, Jyotsna Kumar Mandal, Sudipta Roy, 2022-07-21. This book constitutes the refereed proceedings of the 4th International Conference on Computational Intelligence Communications and Business Analytics CICBA 2022 held in Silchar, India, in January 2022. The 21 full papers and 13 short papers presented in this volume were carefully reviewed and selected from 107 submissions. The papers are organized in topical sections on computational intelligence, computational intelligence in communication, and computational intelligence in analytics.      **Federal Register**, 2013-07.
