## **Planet Of No Return:**

*Planet of No Return* Harry Harrison, 2025-06-25 WORLD SAVING IS HARD WORK Brion Brandd learned that in *Planet of the Damned* Now in this stunning sequel he s going to learn that even when it comes to world saving some jobs are easier than others because the Planet of the Damned was a piece of candy compared to what s waiting for him on Planet of No Return At the Publisher s request this title is being sold without Digital Rights Management Software DRM applied

*Planet of No Return* Harry Harrison, 2011-11-14 Landing on a new planet is a danger every time and Selm II is no exception The specialist didn t like it There were no cities visable from space no broadcasts or transmissions on the airwaves yet the wrecked war machines of an advanced technology littered the rich pastures of the planet Hundreds perhaps thousands of crumpled and gigantic weapons of war a graveyard of destruction stretching almost to the lifeless horizon But the war wasn t over and they weren t all wrecks It s an emergency It s a job for Brian Brand the mightiest weightlifter in the galaxy With the brilliant sensuous Dr Lea Morees at his side he plunges into the war zone into the steel jaws of the Planet of No Return     *Sequels* Janet G. Husband, Jonathan F. Husband, 2009-07-30 A guide to series fiction lists popular series identifies novels by character and offers guidance on the order in which to read unnumbered series     *The Heart of the Wild* Ben A. Minteer, Jonathan B. Losos, 2024-08-13 How do we keep a love of nature and the wild alive in our increasingly human dominated world According to the scientists and writers in this book doing so is of paramount significance however the answer is not necessarily blanket preservation of wild places which is increasingly unrealistic Rather the answer to how to care for nature is more nuanced and often entails acceptance of a broader definition of wild as well and what it means to experience nature This book will be divided into two parts In the first part authors will explore and complicate what wildness means For example science writer Emma Marris argues that spontaneous vegetation and free roaming animals in cities actually possess more autonomy than the wolves or pines of Yellowstone biologist Jonathan Losos asks whether invasive species are necessarily detrimental and may even play a role in restoring ecosystems and psychologist Susan Clayton discusses new ways of experiencing nature particularly via technology and what the benefits and limitations may be In the second half of the book essays will reflect on the roles of naturalism natural history and nature education communication in helping us connect with wild species and landscapes at a time when many of those connections have frayed or even lost altogether     **The Nutshell Technique** Jill Chamberlain, 2016-03-01 Veteran script consultant Jill Chamberlain discovered in her work that an astounding 99 percent of first time screenwriters don t know how to tell a story These writers may know how to format a script write snappy dialogue and set a scene They may have interesting characters and perhaps some clever plot devices But invariably while they may have the kernel of a good idea for a screenplay they fail to tell a story What the 99 percent do instead is present a situation In order to explain the difference Chamberlain created the Nutshell Technique a method whereby writers identify eight dynamic interconnected elements that are required to successfully tell a story Now for

the first time Chamberlain presents her unique method in book form with *The Nutshell Technique Crack the Secret of Successful Screenwriting* Using easy to follow diagrams nutshells she thoroughly explains how the Nutshell Technique can make or break a film script Chamberlain takes readers step by step through thirty classic and contemporary movies showing how such dissimilar screenplays as *Casablanca* *Chinatown* *Pulp Fiction* *The Usual Suspects* *Little Miss Sunshine* *Juno* *Silver Linings Playbook* and *Argo* all have the same system working behind the scenes and she teaches readers exactly how to apply these principles to their own screenwriting Learn the Nutshell Technique and you ll discover how to turn a mere situation into a truly compelling screenplay story

**Security in Crisis** Columba Peoples, 2024-09-19 The concept of crisis is a recurrent staple in representations of modern forms of insecurity from nuclear proliferation to cyber security armed conflict the instability of political institutions from pandemics to risks of social and financial collapse Amidst this seeming ubiquity and ever presence the onset of climate and ecological emergencies as potential planetary scale threats to the habitability of the Earth raise particularly urgent questions for how we conceive of and deal with crisis insecurity How these forms of planetary insecurity come to be known understood and managed is thus of pressing importance *Security in Crisis* seeks to provide an analysis of the complex combinations of political and technological understandings entailed in what it terms as planetary crisis management Arguing that the emergence scope and scale of planetary insecurity and crisis management challenge traditional disciplinary boundaries of the study of International Relations and security the book adopts an interdisciplinary outlook It integrates ideas and approaches from across political theory and anthropology on conceptions of crisis including climate science and the wider study of environment and ecology in the Anthropocene on planetary insecurities and ideas of geoengineering science and technology studies on the technopolitics of crisis management and the sociotechnical imagination of planetary futures and critical security studies on critical approaches to the international and to security In the process the book considers how technopolitical fixes for planetary crisis and emergency are often bound up with vexed questions of who we are and what it means to imagine and secure a planetary future

**The Crisis in Global Ethics and the Future of Global Governance** Peter Burdon, Klaus Bosselmann, Kirsten Engel, 2019 p p1 margin 0 0px 0 0px

0 0px 0 0px font 10 0px Arial This thought provoking book stimulates dialogue and action on the role of global ethics in the governance of individual societies and the international order Such inquiry is imperative given the extraordinary challenges that face the world today Leading figures in environmental ethics philosophy and law approach questions surrounding global ethics and governance from a range of cultural and philosophical perspectives **Harry Harrison** Paul Tomlinson, Harry Harrison, 2002-04-01 The definitive Harry Harrison bibliography with lengthy annotations and a special bonus the Harrison story written for Harlan Ellison's unpublished Last Dangerous Visions anthology *A God Who Cares?* Ernst Conradie, 2025-02-26 This monograph may be read as a constructive supplement to Volume 4 of the series entitled An Earthed Faith Telling the Story amid the Anthropocene Volume 4 of this series is on the Christian doctrine of providence and is entitled Making Room for the Story to Continue In addition to an extended introduction on the state of the debate in the field this monograph includes three constructive essays on the doctrine of providence employing the traditional Reformed distinction between conservatio gubernatio and concursus as aspects of God's providence as well as a concluding essay provocatively entitled Who Cares a Damn The argument of this contribution may be captured in the following way 1 That God's providence is best understood in terms of the deeply held Christian conviction that God cares for every creature and not in terms of Greek assumptions around a pervading rational world order 2 That conservatio and gubernatio have found rough secular equivalents in global debates on sustainability mitigation and adaptation in the context of climate change 3 That conservatio and gubernatio are typically in tension with each other when it comes to the question whether God maintains order in nature and society or whether God transforms unjust orders the call for ecojustice 4 That concursus is not only an implication of conservatio and gubernatio but also captures the heart of the problem posed by the advent of the Anthropocene namely that some humans have become a geological force of nature while God's agency has become sidelined or usurped by the Promethean quest to become divine In each of these essays a highly constructive contribution is offered that advances the debate in eco theology by placing providence in the context of the shift from the Holocene to the Anthropocene The method adopted is a constructive argument based on a critical review of the available literature This monograph is scholarly and is addressed to other scholars in the fields of eco theology systematic theology and Reformed theology **Conservation** Helen Kopnina, Haydn Washington, 2019-08-05 This book provides keys to decrypt current political debates on the environment in light of the theories that support them and provides tools to better understand and manage environmental conflicts and promote environmentally friendly behaviour As we work towards global sustainability at a time when efforts to conserve biodiversity and combat climate change correspond with land grabs by large corporations food insecurity and human displacement While we seek to reconcile more than human relations and responsibilities in the Anthropocene we also struggle to accommodate social justice and the increasingly global desire for economic development These and other challenges fundamentally alter the way social scientists relate to communities and the environment This

book takes as its point of departure today's pressing environmental challenges particularly the loss of biodiversity and the role of communities in protected areas conservation In its chapters the authors discuss areas of tension between local livelihoods and international conservation efforts between local communities and wildlife and finally between traditional ways of living and modernity The central premise of this book is while these tensions cannot be easily resolved they can be better understood by considering both social and ecological effects in equal measure While environmental problems cannot be seen as purely ecological because they always involve people who bring to the environmental table their different assumptions about nature and culture so are social problems connected to environmental constraints While nonhumans cannot verbally bring anything to this negotiating table aside from vast material benefits that society relies on the distinct perspective of this book is that there is a need to consider the role of nonhumans as equally important stakeholders albeit without a voice This book develops an argument that human environmental relationships are set within ecological reality and ecological ethics and rather than being mutually constitutive processes humans have obligate dependence on nature not vice versa This would enable an ethical position encompassing the needs of other species and giving simultaneous without one being subordinated to another consideration to justice for humans and non humans alike The book is accessible to both social scientists and conservation specialists and intends to contribute to strengthening interdisciplinary collaborations in the field of conservation

**The Synthetic Age** Christopher J. Preston, 2018-03-16 Imagining a future in which humans fundamentally reshape the natural world using nanotechnology synthetic biology de extinction and climate engineering We have all heard that there are no longer any places left on Earth untouched by humans The significance of this goes beyond statistics documenting melting glaciers and shrinking species counts It signals a new geological epoch In *The Synthetic Age* Christopher Preston argues that what is most startling about this coming epoch is not only how much impact humans have had but more important how much deliberate shaping they will start to do Emerging technologies promise to give us the power to take over some of Nature's most basic operations It is not just that we are exiting the Holocene and entering the Anthropocene it is that we are leaving behind the time in which planetary change is just the unintended consequence of unbridled industrialism A world designed by engineers and technicians means the birth of the planet's first Synthetic Age Preston describes a range of technologies that will reconfigure Earth's very metabolism nanotechnologies that can restructure natural forms of matter molecular manufacturing that offers unlimited repurposing synthetic biology's potential to build not just read a genome biological mini machines that can outdesign evolution the relocation and resurrection of species and climate engineering attempts to manage solar radiation by synthesizing a volcanic haze cool surface temperatures by increasing the brightness of clouds and remove carbon from the atmosphere with artificial trees that capture carbon from the breeze What does it mean when humans shift from being caretakers of the Earth to being shapers of it And in whom should we trust to decide the contours of our synthetic future These questions are too important to be left to

the engineers      *Humanizing Education in the 3rd Millennium* R. Scott Webster, Timo Airaksinen, Poonam Batra, Margarita Kozhevnikova, 2022-06-20 This book proposes some insights and ideas into how education might be humanized The chapters inform provoke and guide further inquiries into imagining and actualizing human education It presents the view that education should be primarily understood as human education which offers universal good for the entire planet It centres around the significant values that make life in a holistic sense meaningful worthwhile and socially just It discusses the fundamental idea that human education is the key to peace individual and social freedoms social justice and harmony fraternity and happiness all over the world and how educational ideals and methods must be reconsidered to achieve this end This book originates from an international conference and round table Human Education in the 3rd Millennium in July 2019 in Dharamsala India      *Ignoring Nature No More* Marc Bekoff, 2013-06-01 For far too long humans have been ignoring nature As the most dominant overproducing overconsuming big brained big footed arrogant and invasive species ever known we are wrecking the planet at an unprecedented rate And while science is important to our understanding of the impact we have on our environment it alone does not hold the answers to the current crisis nor does it get people to act In *Ignoring Nature No More* Marc Bekoff and a host of renowned contributors argue that we need a new mind set about nature one that centers on empathy compassion and being proactive This collection of diverse essays is the first book devoted to compassionate conservation a growing global movement that translates discussions and concerns about the well being of individuals species populations and ecosystems into action Written by leading scholars in a host of disciplines including biology psychology sociology social work economics political science and philosophy as well as by locals doing fieldwork in their own countries the essays combine the most creative aspects of the current science of animal conservation with analyses of important psychological and sociocultural issues that encourage or vex stewardship The contributors tackle topics including the costs and benefits of conservation behavioral biology media coverage of animal welfare conservation psychology and scales of conservation from the local to the global Taken together the essays make a strong case for why we must replace our habits of domination and exploitation with compassionate conservation if we are to make the world a better place for nonhuman and human animals alike      *The Oxford Handbook of Environmental Ethics* Stephen Mark Gardiner, Allen Thompson, 2017 We live during a crucial period of human history on Earth Anthropogenic environmental changes are occurring on global scales at unprecedented rates Despite a long history of environmental intervention never before has the collective impact of human behaviors threatened all of the major bio systems on the planet Decisions we make today will have significant consequences for the basic conditions of all life into the indefinite future What should we do How should we behave In what ways ought we organize and respond The future of the world as we know it depends on our actions today A cutting edge introduction to environmental ethics in a time of dramatic global environmental change this collection contains forty five newly commissioned articles with contributions from well established experts and emerging voices in the

field Chapters are arranged in topical sections social contexts history science economics law and the Anthropocene who or what is of value humanity conscious animals living individuals and wild nature the nature of value truth and goodness practical reasons hermeneutics phenomenology and aesthetics how things ought to matter consequences duty and obligation character traits caring for others and the sacred essential concepts responsibility justice gender rights ecological space risk and precaution citizenship future generations and sustainability key issues pollution population energy food water mass extinction technology and ecosystem management climate change mitigation adaptation diplomacy and geoengineering and social change conflict pragmatism sacrifice and action Each chapter explains the role played by central theories ideas issues and concepts in contemporary environmental ethics and their relevance for the challenges of the future **The Last**

**Astronauts Double** Michael Pickering, 2023-12-23 She came from a dying world hoping to find a new home among the stars But her journey ended in tragedy Her colony ship crashed on Earth leaving only five survivors She was injured and left in stasis She remained asleep for 6000 years oblivious to the influence of the other four survivors on the planet's history When she finally woke up she found herself in a world that was both strange and familiar Humans have evolved and progressed but they also faced many threats and conflicts She tried to fit in and learn from their culture hiding her identity She was the last of her kind an alien with secrets that could alter the fate of history But she was not alone Her friends Alex Theo and Lena who discovered her spaceship and Doctor Sarah Jones an archaeologist who studied Sumerian mythology were determined to help her and protect her Together they uncovered a shocking truth she had been cloned by a mysterious organization that wanted to exploit her DNA for their agenda They were pursued by enemies who would do anything to capture her Could she and her friends stop the cloning operation and prevent a war Could she find a place for herself in this new world Or would she be the last of her race to ever see the stars **Creation and Ecology** Ronald A. Simkins, 2020-12-24 In this book Ronald

A Simkins addresses the current environmental crisis and what the Bible might contribute in response to it The environmental crisis includes loss of biodiversity degradation of the soil and especially climate change If left unchecked these trends will bring about the collapse of human civilization These environmental problems are interrelated and share a similar cause the exploitation of the natural world through an economy structured by capitalist relations of production and powered by the burning of fossil fuels Through our economic relations we have depleted natural resources polluted natural environments and altered natural processes These problems are a product of our political economy which entails not only our politics ideology and religion but primarily our economic system Because the crisis is economic at its core Simkins first sets the Bible within its own economic context exploring how the biblical ideas of creation an understanding of the human relationship to the natural world were the product of the ancient Israelite political economy Then Simkins places the biblical tradition in conversation with the current environmental crisis The result is a far richer view of creation in the biblical tradition and a better understanding of what is at stake in the current environmental crisis *Rewilding Our Hearts* Marc

Bekoff,2014-10-15 In wildlife conservation rewilding refers to restoring habitats and creating corridors between preserved lands to allow declining populations to rebound Marc Bekoff one of the world s leading animal experts and activists here applies rewilding to human attitudes Rewilding Our Hearts invites readers to do the essential work of becoming reenchanting with the world acting from the inside out and dissolving false boundaries to truly connect with both nature and themselves
