Howell,2013-11-11 Taken together the data presented in this review and work by many other investigators support the notion that DNA excision repair is important in a tumor cell s resistance to platinum compounds Inhibition of this repair system by combination chemotherapy with the excision repair inhibitors HU and Ara C produces synergistic cell kills and increased levels and persistence of DNA interstrand crosslinks The studies with cis DDP and DDP in combination with UV induced thymine dimers suggest that there may be competition for DNA repair enzymes between the dimer and the platinum lesion Whether the competing lesion is an intrastrand crosslink interstrand crosslink or platinum monoadduct or all of these lesions cannot be determined The similarity between an intrastrand crosslink and a cyclobutane dimer suggests that these lesions may compete for repair However the increased peak levels of interstrand crosslinks and increased persistence of these lesions at later time points suggest that this lesion may also be a substrate for the repair system These observations may be of clinical relevance Recently Dr Kathy Albain of our institution has completed a Phase III I study using a 12 hour pretreatment with HU and Ara C in patients prior to their cis DDP therapy She observed a significant number of responders in this trial 54 She is currently completing a second Phase IIII study substituting IV HU for the oral formulation We anticipate initiating other clinical trials based upon these observations **The Rotarian** ,1923-11 Established in 1911 The Rotarian is the official magazine of Rotary International and is circulated worldwide Each issue contains feature articles columns and departments about or of interest to Rotarians Seventeen Nobel Prize winners and 19 Pulitzer Prize winners from Mahatma Ghandi to Kurt Vonnegut Jr have written for the magazine **New Trends in Cancer for the 21st Century** Antonio Llombart-Bosch,Vicente Felipo,2012-12-06 Given the latest advances in cancer research which includes basic research and
