language and mind are under investigation This book is a study of such foundational questions Exploring Chomsky s claims Nirmalangshu Mukherji argues that the significance of biolinguistic inquiry extends beyond the domain of language Biolinguistics is primarily concerned with grammars that represent just the computational aspects of the mind brain This restriction to grammars Mukherji argues opens the possibility that the computational system of human language may be involved in each cognitive system that requires similar computational resources Deploying analytical argumentation and empirical evidence Mukherji suggests that a computational system of language consisting of very specific principles and operations is likely to be involved in each articulatory symbol system such as music that manifests unboundedness In that sense the biolinguistics approach may have identified after thousands of years of inquiry a specific structure of the human mind
