*Youth in Prison* M. A. Bortner, Linda Williams, 2012-11-12 Based on two years of intensive research in a juvenile prison this study tells the story of youths in a model program created after a class action lawsuit for inhumane and illegal practices It captures their lives inside and outside of prison from drugs gangs and criminal behaviour to the realities of families schools and neighbourhoods Drawing on experience that encompasses 20 years of juvenile justice research and policy analysis the authors scrutinize the prison s attempts to combine accountability and treatment for youths with protection for the public situating these within the larger social and political context

*A Guidebook for Advanced Composition and Textual Analysis* John C. Rasmussen, 2022-01-19 A Guidebook for Advanced Composition and Textual Analysis By Dr John C Rasmussen The Guidebook was designed with the non traditional student in mind It addresses the needs of those students returning to college after being out of school for some time as a result of raising a family work military or other break from the traditional four year pattern The Guidebook begins with basic composition skills and then builds on them to lead students to graduate level effectiveness Students will discover advanced composition skills are really basic skills that pay attention to additional considerations of composition Because each consideration is a step to the next students will find the road to advanced composition manageable and obtainable

*The Joy of Teaching* Peter Filene, 2009-11-13 Gathering concepts and techniques borrowed from outstanding college professors The Joy of Teaching provides helpful guidance for new instructors developing and teaching their first college courses Award winning professor Peter Filene proposes that teaching should not be like a baseball game in which the instructor pitches ideas to students to see whether they hit or strike out Ideally he says teaching should resemble a game of Frisbee in which the teacher invites students to catch ideas and pass them on Rather than prescribe any single model for success Filene lays out the advantages and disadvantages of various pedagogical strategies inviting new teachers to make choices based on their own personalities values and goals Filene tackles everything from syllabus writing and lecture planning to class discussions grading and teacher student interactions outside the classroom The book s down to earth accessible style makes it appropriate for new teachers in all fields Instructors in the humanities the social sciences and the natural sciences will all welcome its invaluable tips for successful teaching and learning

**Dale Fiers** D. Duane Cummins, 2003 Many call A Dale Fiers the most significant figure in the Christian Church Disciples of Christ of the twentieth century Raised in a devout family his mother was ordained in Kankakee Illinois and West Palm Beach Florida Fiers went on to have major impact not only on his denomination but on American Protestantism in general particularly its approach to such social issues as missionary work and civil rights Fiers served as executive secretary of the International Convention of the Christian Church Disciples of Christ

president of the United Christian Missionary Society administrative secretary of the Commission on Restructure and was the first general minister and president of the church Restructure was the process by which thousands of scattered Disciples congregations became an expression of one Church This 1960s development towers over the landscape of Disciples history like a great mountain range and Fiers looms over the era as its central figure In this biography commissioned by the Disciples of Christ Historical Society D Duane Cummins crafts a picture of a remarkable church leader and chronicles the way a significant religious body dealt with the ambivalences of its own existence how missionary work developed into less paternalistic relationships how a church struggled between attempts to minister on the local scene and throughout the world Fiers lived in Florida and remained active in Disciples affairs until his death at age ninety six in 2003 *The Modern Middle School* Gilbert Hunt, Dennis Wiseman, Sandra Bowden, 2003 Middle school educators are facing many challenges in today's educational and political environment due to the focus on excellence as measured by achievement tests It is the purpose of this book to provide a discussion of how middle schools can provide a strong standards based academic program while at the same time remaining focused on the student centered principles upon which the middle school experience should be based The text is intended to aid readers in the development of the teaching philosophies behaviors and skills relevant to effective instruction in the unique middle school environment This emphasis reflects the philosophy that teachers ultimately determine the quality of schooling and that the learning environment should be student centered while maintaining a strong academic foundation The text begins with an overview of the origins and essential elements of middle schools proceeds through discussions of middle school teachers students schooling structures and teaching strategies and concludes with a view of the future Specifically chapters offer suggestions for teaching and learning in the middle school environment for developing essential teaching characteristics for creating a positive middle school climate for planning the curriculum for providing developmentally appropriate instruction and for assessing and reporting student progress This outstanding new edition provides a comprehensive current and cohesive text that allows the reader to more clearly understand the nature and importance of significant standards issues and developments within the ongoing evolution of the modern American middle school **Invisible Forces** Pei Pei Liu, 2023-12-01 Explores the critical role that classroom educators play in supporting student motivation throughout the transition from high school to college Educators consistently identify student motivation as a top concern particularly during the transition to college but often feel helpless to influence it Some assume that students are simply motivated or not Others are daunted by trying to shape an unobservable psychological phenomenon Invisible Forces provides a framework for thinking of student motivation as a set of internal mindsets that are promoted or thwarted through a complex ecology of personal classroom institutional and systemic factors Using the method of portraiture Pei Pei Liu brings this ecology to life The book presents a series of four rich case studies of educators efforts to support student motivation and the challenges they encounter in secondary and postsecondary writing classrooms Attuned to

the unique status of writing based courses as a near universal academic experience throughout the transition from high school to college these portraits shed light on different strategies make a case for institutional support of instructors and pave the way for greater alignment between secondary and postsecondary settings

*Learning Bio-Micro-Nanotechnology* Mel I. Mendelson, 2013-01-04 *Learning Bio Micro Nanotechnology* is a primer on micro nanotechnology that teaches the vocabulary fundamental concepts and applications of micro nanotechnology in biology chemistry physics engineering electronics computers biomedicine microscopy ethics and risks to humankind It provides an introduction into the small world with a low fog index emphasizing the concepts using analogies and illustrations to simplify the non observables The chapters have many thinking exercises and summaries with references at the end of each chapter The questions at the end are divided into Bloom s taxonomy of learning skills and also include team exercises and methods to assess learning There are many calculations using dimensional analysis according to first principles but the math is purposely kept at a low level and is used as a means of understanding the concepts The appendices provide a math review and a glossary of terms Carefully designed as an easy to read textbook and a practical reference this book emphasizes learning micro nanotechnology vocabulary concepts and applications from first principles and from a multi disciplinary point of view This makes it suitable for one and two semester courses as well as a reference for professionals in the field

**Teaching New Religious Movements** David G. Bromley, 2007-05-25 Since its inception around 1970 the study of New Religious Movements NRMs has evolved into an established multidisciplinary field. At the same time both the movements and the scholars who study them have been the subjects of intense controversy. In this volume a group of senior NRM scholars who have been instrumental in the development of the field will offer pivotal essays that present the basics of NRM scholarship along with guidance for teachers on classroom use. The book is organized topically around subjects that are both central to the study of NRMs and likely to be useful to non-specialists. Part I contains examinations of the definitional boundaries of the area of study; varying disciplinary perspectives on NRMs; unique methodological ethical problems encountered in the study of NRMs and the controversies that have confronted scholars studying NRMs and the movements themselves. Part II examines a series of topics central to teaching about NRMs: the larger sociocultural significance of the movements; their distinctive symbolic and organizational features; the interrelated processes of joining and leaving NRMs; the organization of gender roles in NRMs; media and popular culture portrayals of the movements; the occurrence of corruption and abuse within movements and violence by and against NRMs. Part III provides informational resources for teaching about NRMs which are particularly important in a field where knowing the biases of sources is crucial. With its interdisciplinary approach the volume provides comprehensive accessible information and perspectives on NRMs. It is an invaluable guide for instructors navigating this scholarly minefield.

Environmental Health Perspectives, 1993

The Joy of Teaching (EasyRead Large Bold Edition) Peter G. Filene, 2008 This book provides helpful guidance for new instructors developing and teaching their first college courses. In the book the author proposes that teaching should not be like a baseball game in which the instructor pitches ideas to students to see whether they hit or strike out. Ideally he says teaching should resemble a game of Frisbee in which the teacher invites students to catch ideas and pass them on. Rather than prescribe a single model for success he examines the advantages and disadvantages of various pedagogical strategies inviting new teachers to make choices based on their own personalities values and goals. In the book he also tackles everything from syllabus writing and lecture planning to class discussions grading and teacher student

interactions outside the classroom The book is for new teachers in all fields Instructors in the humanities the social sciences and the natural sciences will all welcome its invaluable tips for successful teaching and learning Back cover
