

Name: _____
Date: _____

Subject: Year 3 Science
Sheet: Plants

Types of plants

Plants can be divided into two groups: flowering plants and nonflowering plants. Let's take a look at some different types of plants.

Grasses

Did you know that almost 40% of all land on Earth is covered in grass? Grasses include bamboos and cereals. They have hollow stems and branching roots.

Trees and bushes

Trees and bushes are known as woody plants. They have hard, woody stems and branches. Trees can live for thousands of years and their roots usually spread widely underground. Most importantly, trees help clean the air by removing carbon dioxide. Some trees lose their leaves in winter. They are called deciduous trees whereas some trees keep their leaves. They are called evergreen trees such as fir trees.

Mosses

Mosses are usually found in damp, shady places. They don't have roots, stems, or flowers. They absorb huge amounts of water. Mosses like clean, moist environments and are easily damaged by pollution.

Fungi

These plants include mushrooms and molds. They reproduce through spores, not pollen or seeds. Some fungi, like mushrooms, can be eaten, but you should never pick and eat wild mushrooms because many are poisonous.

Write **true** or **false**.

1. Grasses have hollow stems. _____
2. Trees have soft stems and branches. _____
3. Mosses are easily damaged by pollution. _____
4. Spores are produced by fungi. _____
5. Mosses have roots and stems. _____

Choose the correct words to fill in the blanks.

6. Mosses are usually found in _____ (damp / dry) places.
7. Mushrooms are types of _____ (trees / fungi).
8. Fir trees are _____ (deciduous / evergreen) trees.
