Resources in Education ,1990 The Rebirth of Dialogue James P. Zappen,2012-02-01 Dialogue has suffered a long eclipse in the history of philosophy and the history of rhetoric but has enjoyed a rebirth in the work of Hans Georg Gadamer Martin Buber and Mikhail Bakhtin Among twentieth century figures Bakhtin took a special interest in the history of the dialogue form This book explores Bakhtin s understanding of Socratic dialogue and the notion that dialogue is not simply a way of persuading others to accept our ideas but a way of holding ourselves and others accountable for all of our thoughts words and actions In supporting this premise Bakhtin challenges the traditions of argument and persuasion handed down from Plato and Aristotle and he offers as an alternative a dialogical rhetoric that restructures the traditional relationship between speakers and listeners writers and readers as a mutual testing contesting and creating of ideas The author suggests that Bakhtin s dialogical rhetoric is not restricted to oral discourse but is possible in any medium including written graphic and digital Catalog of Copyright Entries. the very existence of low cost high quality private schools shatters the prevailing myth in the U S U K and western Europe that absent government affordable high quality schools for the poor could not exist But they do And they are ubiquitous and in high demand Founded by unheralded local educational entrepreneurs these schools are proving that self organized education is not just possible but flourishing often enrolling far more students than free government schools do at prices within reach of even the most impoverished families In the course of his analysis Tooley asks the key questions What proportion of poor children is served How good are the private schools What are the business models for these schools And can they be replicated and improved The evidence is in In poor urban and rural areas around the world children in low cost private schools outperform those in government schools And the schools do so for a fraction of the per pupil cost Ubiquity affordability quality value for money equity choice and sustainability these are the seven categories by which schooling should be judged according to Tooley In every instance one is forced to conclude that low cost non governmental entrepreneurial education as practiced by the poor around the globe contains the key to their rise to prosperity and leadership positions within their own respective cultures Alarmed by recent government barriers in education Americans can now find hope in the triumph in the face of acute adversity of these remarkable schools Because of the pandemic parents in America and Europe are discovering that the education of their children is indeed possible and likely far better without government meddling with rigid seat time mandates outdated school calendars absurd age driven grade levels and worse testing regimes And having experienced the first fruits of educational freedom parents will be increasingly open to the possibilities of ever greater educational entrepreneurship and innovation Thankfully they have Really Good Schools to show the way
